About The Global State of Democracy Indices
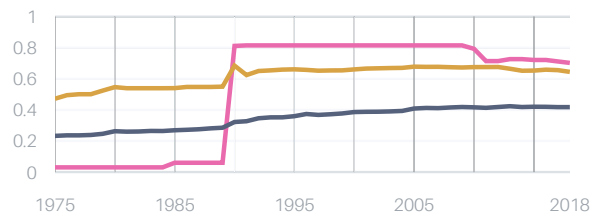

The Global State of Democracy (GSoD) indices depict democratic trends at the country, regional and global levels across a broad range of different attributes of democracy in the period 1975–2018. The indices produce data for 158 countries across the globe. The indices consist of attribute and subattribute scores per country per year for the period 1975–2018. All scoring runs from 0 to 1, with 0 representing the lowest achievement in the whole sample and 1 the highest. The data underlying the indices is based on 97 indicators developed by various scholars and organizations.
