Acknowledgements

International IDEA would like to thank everyone who has been involved in the production of the Global State of Democracy Indices. The Indices have benefited from the contributions of many individuals at International IDEA, and from the expert input of members of the Institute's partner organizations. In particular, thanks to Lina Antara, Martin Brüssis, Thijs Heinmaa, Mélida Jiménez, Joseph Noonan, Miguel Ángel Lara Otaola, Victoria Perotti, Svend-Erik Skaaning, and Claudiu D. Tufis for their contributions to the development of the Global State of Democracy Indices, and to the members of the Expert Advisory Board for their review of this Codebook and related documentation.

Methodology and data set development (Global State of Democracy Indices)

Svend-Erik Skaaning, Professor at the Department of Political Science at Aarhus University, Project Manager, Varieties of Democracy (V-Dem) project

Claudiu D. Tufis, Associate Professor, University of Bucharest, Political Science Department

Expert Advisory Board (Global State of Democracy Indices)

Michael Bernhard, Raymond and Miriam Ehrlich Chair, Professor at the Department of Political Science at the University of Florida

Michael Coppedge, Professor at the Department of Political Science and Faculty Fellow at the Kellogg Institute of International Studies at the University of Notre Dame, Co-Principal Investigator of the V-Dem project

Carl-Henrik Knutsen, Professor at the Department of Political Science at the University of Oslo, Co-Principal Investigator of the V-Dem project

Staffan Lindberg, Professor at the Department of Political Science at the University of Gothenburg, Director of the V-Dem Institute

Gerardo Munck, Professor at the School of International Relations at the University of Southern California

About this document

The Global State of Democracy Indices Codebook, Version 9 presents information about all the variables included in the Global State of Democracy (GSoD) Indices data set: identifying variables, attributes of democracy, subattributes, subcomponents and indicators. The other two documents that describe the data and data-generation process are *The Global State of Democracy Indices Methodology: Conceptualization and Measurement Framework, Version 9* (Skaaning and Hudson 2025), which presents the theoretical framework that guided the construction of the Indices, and *The Global State of Democracy Indices: Technical Procedures Guide, Version 9* (Tufis and Hudson 2025), which outlines the technical aspects of constructing the Indices.

Version 9 of the GSoD Indices depicts democratic trends at the country, regional and global levels across a broad range of different attributes of democracy in the period 1975–2024 but does not provide a single index of democracy. The Indices produce data for 174 countries. The data underlying the Indices is based on a total of 154 indicators developed by various scholars and organizations using different types of sources, including expert surveys, standards-based coding by research groups and analysts, observational data and composite measures.

The Global State of Democracy is a report that aims to provide policymakers with an evidence-based analysis of the state of global democracy, supported by the GSoD Indices, in order to inform policy interventions and identify problem-solving approaches to trends affecting the quality of democracy around the world.¹ The first edition of the report (International IDEA 2017) explored the conditions under which democracy can be resilient and how to strengthen its capacity as a system to overcome challenges and threats.

Version 9 of the GSoD Indices can be accessed online:

<<https://www.idea.int/democracytracker/gso-d-indices>>

SUGGESTED CITATION

International IDEA, *The Global State of Democracy Indices, 1975–2024, v. 9*, 2025, <<https://www.idea.int/democracytracker/gso-d-indices>>, [accessed date]

¹ In the *Global State of Democracy Reports*, we use different terms to refer to the three levels of aggregation in the data set. In this codebook (and other data set documentation) the three levels of aggregation are (from highest to lowest): attributes, subattributes and subcomponents. In the Report, we have made the language more accessible by referring instead to categories (attributes), factors (subattributes), and subfactors (subcomponents).

Abbreviations

The data sets that are used to build the Global State of Democracy Indices are referred to throughout this codebook using abbreviations or acronyms for the data set name as follows:

| | |

INTRODUCTION

The main objective of the GSoD Indices is to provide systematic data that captures trends at the global, regional and national levels for different aspects of International IDEA's comprehensive understanding of democracy. The Indices turn a broad range of empirical indicators from various data sets into measures of different aspects of democracy that can be used to evaluate the state of democracy at the global, regional and national levels. They can also assist stakeholders, such as policymakers, researchers and civil society actors, in their analyses of trends related to different aspects of democracy and identification of priority policy areas.

The GSoD Indices, which were constructed for the first time in 2017 and updated annually, now cover 174 countries in the period 1975 to 2024. They are composite measures based on 154 indicators from different kinds of extant data sources. These indicators are assigned to the different subattributes of the conceptual framework and combined in the GSoD Indices.

The GSoD Indices have been produced by a team of International IDEA staff and two external experts. The construction of the GSoD Indices was supervised by an expert advisory board consisting of five leading experts in the field of democracy measurement. Careful justification and documentation of the conceptual distinctions and methodological choices made as well as the use of state-of-the-art procedures were emphasized at all stages in the construction of the Indices. This was done to ensure consistency and transparency, as well as high levels of measurement validity and reliability.

The main section of the Codebook is devoted to presenting information about all the variables included in the data set. The identifying variables are presented first. The attributes, subattributes, subcomponents and indicators are then presented, grouped by attribute of democracy. Within each attribute, the variables are presented from the highest to the lowest level of aggregation, which means that the attributes are presented first, followed by the

corresponding subattributes, the corresponding subcomponents (only in the case of the second attribute, Rights) and finally the corresponding indicators.

IDENTIFYING VARIABLES

Correlates of War numerical country code (COWcode)

| | |
|-------------------|---|
| Original variable | Constructed variable |
| Name in data set | COWcode |
| Definition | This is an identification variable, which uniquely identifies each of the 174 countries in the data set. The values this variable takes are the Correlates of War numeric country code (COWcode). |

Year (year)

| | |
|-------------------|--|
| Original variable | Constructed variable |
| Name in data set | year |
| Definition | This is an identification variable, which uniquely identifies each of the 50 years included in the data set (from 1975 to 2024). |

Country Year (country_year)

| | |
|-------------------|---|
| Original variable | Constructed variable |
| Name in data set | country_year |
| Definition | This is an identification variable, which uniquely identifies each combination of country and year (the country-year) in the data set. It has been constructed by concatenating the Correlates of War country code (COWcode) and the year, so that the last four digits of the variable always indicate the year, while the first one to three digits preceding the year represent the COWcode. |

ISO 3166-1 alpha-3 (iso3c)

| | |
|--------------------------|---|
| Original variable | Constructed variable |
| Name in data set | iso3c |
| Definition | This is an identification variable, which uniquely identifies each of the 174 countries included in the data set. The three-character codes are taken from the International Organization for Standardization (ISO) ISO 3166 standard. Where there is no ISO assigned three-character code, others in common use have been assigned: XKX (Kosovo), PSE (Palestine). The ISO-deprecated DDR code has been retained for the German Democratic Republic. |

Country Name (country_name)

| | |
|--------------------------|---|
| Original variable | Constructed variable |
| Name in data set | country_name |
| Definition | This is an identification variable, which uniquely identifies each of the 174 countries in the data set. The values this variable takes are the names of the countries included in the data set, following the European Union's standard short names for countries in English. |
| Countries | Afghanistan, Albania, Algeria, Angola, Argentina, Armenia, Australia, Austria, Azerbaijan, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Benin, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Bulgaria, Burkina Faso, Burundi, Cabo Verde, Cambodia, Cameroon, Canada, Central African Republic, Chad, Chile, China, Colombia, Comoros, Congo, Costa Rica, Côte d'Ivoire, Croatia, Cuba, Cyprus, Czechia, Democratic Republic of the Congo, Denmark, Djibouti, Dominican Republic, East Germany, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Eswatini, Ethiopia, Fiji, Finland, France, Gabon, Georgia, Germany, Ghana, Greece, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, Kosovo, Kuwait, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Libya, Lithuania, Luxembourg, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Mauritania, Mauritius, Mexico, Moldova, Mongolia, Montenegro, Morocco, Mozambique, Myanmar, Namibia, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, North Korea, North Macedonia, Norway, Oman, Pakistan, Palestine, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Rwanda, Saudi Arabia, Senegal, Serbia, Sierra Leone, Singapore, Slovakia, Slovenia, Solomon Islands, Somalia, South Africa, South Korea, South Sudan, Spain, Sri Lanka, Sudan, Suriname, Sweden, Switzerland, Syria, Taiwan, Tajikistan, Tanzania, Thailand, The Gambia, Timor-Leste, Togo, Trinidad and Tobago, Tunisia, Türkiye, Turkmenistan, Uganda, Ukraine, United Arab Emirates, United Kingdom, United States, Uruguay, Uzbekistan, Vanuatu, Venezuela, Vietnam, Yemen, Zambia, Zimbabwe |

Country Name (country_name_full)

| | |
|-------------------|---|
| Original variable | Constructed variable |
| Name in data set | country_name_full |
| Definition | This is an identification variable, which uniquely identifies each of the 174 countries in the data set. The values this variable takes are the names of the countries included in the data set, following the European Union's standard full names for countries in English. |

Countries

Islamic Republic of Afghanistan, Republic of Albania, People's Democratic Republic of Algeria, Republic of Angola, Argentine Republic, Republic of Armenia, Commonwealth of Australia, Republic of Austria, Republic of Azerbaijan, Kingdom of Bahrain, People's Republic of Bangladesh, Barbados, Republic of Belarus, Kingdom of Belgium, Republic of Benin, Kingdom of Bhutan, Plurinational State of Bolivia, Bosnia and Herzegovina, Republic of Botswana, Federative Republic of Brazil, Republic of Bulgaria, Burkina Faso, Republic of Burundi, Republic of Cabo Verde, Kingdom of Cambodia, Republic of Cameroon, Canada, Central African Republic, Republic of Chad, Republic of Chile, People's Republic of China, Republic of Colombia, Union of the Comoros, Republic of the Congo, Republic of Costa Rica, Republic of Côte d'Ivoire, Republic of Croatia, Republic of Cuba, Republic of Cyprus, Czech Republic, Democratic Republic of the Congo, Kingdom of Denmark, Republic of Djibouti, Dominican Republic, Republic of Ecuador, Arab Republic of Egypt, Republic of El Salvador, Republic of Equatorial Guinea, State of Eritrea, Republic of Estonia, Kingdom of Eswatini, Federal Democratic Republic of Ethiopia, Republic of Fiji, Republic of Finland, French Republic, Gabonese Republic, Georgia, Federal Republic of Germany, Republic of Ghana, Hellenic Republic, Republic of Guatemala, Republic of Guinea, Republic of Guinea-Bissau, Cooperative Republic of Guyana, Republic of Haiti, Republic of Honduras, Hungary, Iceland, Republic of India, Republic of Indonesia, Islamic Republic of Iran, Republic of Iraq, Ireland, State of Israel, Italian Republic, Jamaica, Japan, Hashemite Kingdom of Jordan, Republic of Kazakhstan, Republic of Kenya, Republic of Kosovo, State of Kuwait, Kyrgyz Republic, Lao People's Democratic Republic, Republic of Latvia, Lebanese Republic, Kingdom of Lesotho, Republic of Liberia, State of Libya, Republic of Lithuania, Grand Duchy of Luxembourg, Republic of Madagascar, Republic of Malawi, Malaysia, Republic of Maldives, Republic of Mali, Republic of Malta, Islamic Republic of Mauritania, Republic of Mauritius, United Mexican States, Republic of Moldova, Mongolia, Montenegro, Kingdom of Morocco, Republic of Mozambique, Myanmar, Republic of Namibia, Federal Democratic Republic of Nepal, Kingdom of the Netherlands, New Zealand, Republic of Nicaragua, Republic of Niger, Federal Republic of Nigeria, Democratic People's Republic of Korea, Republic of North Macedonia, Kingdom of Norway, Sultanate of Oman, Islamic Republic of Pakistan, State of Palestine, Republic of Panama, Independent State of Papua New Guinea, Republic of Paraguay, Republic of Peru, Republic of the Philippines, Republic of Poland, Portuguese Republic, State of Qatar, Romania, Russian Federation, Republic of Rwanda, Kingdom of Saudi Arabia, Republic of Senegal, Republic of Serbia, Republic of Sierra Leone, Republic of Singapore, Slovak Republic, Republic of Slovenia, Solomon Islands, Federal Republic of Somalia, Republic of South Africa, Republic of Korea, Republic of South Sudan, Kingdom of Spain, Democratic Socialist Republic of Sri Lanka, Republic of the Sudan, Republic of Suriname, Kingdom of Sweden, Swiss Confederation, Syrian Arab Republic, Taiwan, Republic of Tajikistan, United Republic of Tanzania, Kingdom of Thailand, Republic of The Gambia, Democratic Republic of Timor-Leste, Togolese Republic, Republic of Trinidad and Tobago, Republic of Tunisia, Republic of Türkiye, Turkmenistan, Republic of Uganda, Ukraine, United Arab Emirates, United Kingdom of Great Britain and Northern Ireland, United States of America, Eastern Republic of Uruguay, Republic of Uzbekistan, Republic of Vanuatu, Bolivarian Republic of Venezuela, Socialist Republic of Vietnam, Republic of Yemen, Republic of Zambia, Republic of Zimbabwe

Region name (region_name)

| | |
|-------------------|---|
| Original variable | Constructed variable |
| Name in data set | region |
| Definition | This is an identification variable, which uniquely identifies each of the five regions in the data set. The values this variable takes are the names of the regions included in the data set. For more details see Tufis and Hudson (2025). |
| Regions | Africa, Americas, Asia and the Pacific, Western Asia, Europe |

Region (region)

| | |
|-------------------|--|
| Original variable | Constructed variable |
| Name in data set | region |
| Definition | This is an identification variable, which uniquely identifies each of the five regions in the data set with a numerical value. The values this variable takes are the names of the regions included in the data set. For more details see Tufis and Hudson (2025). |
| Regions | Africa = 1 Americas = 2 Asia and the Pacific = 3 Western Asia = 5 Europe = 6 |

Subregion name (subregion_name)

| | |
|-------------------|--|
| Original variable | Constructed variable |
| Name in data set | subregion |
| Definition | This is an identification variable, which uniquely identifies each of the 18 subregions in the data set. The values this variable takes are the names of the subregions included in the data set. For more details see Tufis and Hudson (2025). |
| Subregions | East Africa, Central Africa, Southern Africa, West Africa, North Africa, Caribbean, Central America, South America, Northern America, Central Asia, East Asia, South Asia, South-East Asia, Oceania, Western Asia, Central Europe, Eastern Europe, North/Western Europe, Southern Europe |

Subregion (subregion)

| | |
|--------------------------|--|
| Original variable | Constructed variable |
| Name in data set | subregion |
| Definition | This is an identification variable, which uniquely identifies each of the 18 subregions in the data set with a numerical value. For more details see Tufis and Hudson (2025). |
| Subregions | East Africa = 1 Central Africa = 2 Southern Africa = 3 West Africa = 4 North Africa = 5 Caribbean = 6 Central America = 7 South America = 8 Northern America = 9 Central Asia = 10 East Asia = 11 South Asia = 12 South-East Asia = 13 Oceania = 14 Western Asia = 15 Central Europe = 16 Eastern Europe = 17 North/Western Europe = 18 Southern Europe = 19 |

Chapter 1

REPRESENTATION

Representation is the first of the four attributes of democracy developed for International IDEA's Global State of Democracy Indices. This chapter of the Codebook provides details about the subattributes and indicators that comprise the index of Representation.

1 attribute

- Representation

6 subattributes

- Credible Elections
- Inclusive Suffrage
- Free Political Parties
- Elected Government
- Effective Parliament
- Local Democracy

35 indicators

ATTRIBUTE

Representation (representation_est)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | representation_est |
| Definition | The Representation attribute emphasizes contested and inclusive popular elections for legislative and executive offices. This attribute distinguishes among six subattributes. Five of them (Credible Elections, Free Political Parties, Elected Government, Effective Parliament, and Local Democracy) have been aggregated into a contestation index using an item response theory (IRT) measurement model. The Representation index is obtained by multiplying the contestation index by the sixth subattribute, Inclusive Suffrage. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | — |
| Aggregation | — |
| Indicators included | cred_elect_est, inclu_suff_est, free_parties_est, elected_gov_est, effect_parl_est, local_dem_est |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | representation_l = lower bound for the 68% confidence interval representation_lu = upper bound for the 68% confidence interval |

SUBATTRIBUTES

Credible Elections (cred_elect_est)

| | |
|-----------------------------------|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | cred_elect_est |
| Definition | The Credible Elections subattribute denotes the extent to which elections for national, representative political office are free from irregularities. All the selected indicators tap into the quality of elections. One of the V-Dem indicators and the LIED indicator reflect the presence of free elections more generally, whereas the other V-Dem indicators and those from BTI and Freedom House capture more specific aspects of elections, including the fairness of the electoral laws, electoral management body (EMB) autonomy and capacity, government intimidation and other irregularities. The 10 indicators have been aggregated into the Credible Elections subattribute using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 1. Representation |
| Aggregation | Bayesian factor analysis (BFA) of 1.1. Credible Elections, 1.3. Free Political Parties, 1.4. Elected Government, 1.5. Effective Parliament, and 1.6. Local Democracy to create a contestation index. Thereafter multiplication of contestation index and 1.2. Inclusive Suffrage. |
| Indicators included | v_11_01, v_11_02, v_11_03, v_11_04, v_11_05, v_11_06, v_11_07, v_11_08, v_11_09, v_11_10 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | cred_elect_l = lower bound for the 68% confidence interval cred_elect_u = upper bound for the 68% confidence interval |

Inclusive Suffrage (inclu_suff_est)

| | |
|--|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | inclu_suff_est |
| Definition | The inclusive suffrage subattribute denotes the extent to which adult citizens have equal and universal passive and active voting rights. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 1. Representation |
| Aggregation | Weighted average of the two variables, with suffrage counting twice as much as voter registration. Thereafter multiplication with the contestation index. |
| Indicators included | v_12_01, v_12_02 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Free Political Parties (free_parties_est)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | free_parties_est |
| Definition | The Free Political Parties subattribute denotes the extent to which political parties are free to form and campaign for political office. Seven indicators, partly based on expert surveys and partly in-house coded, are used to measure how free political parties are. All of them reflect whether political parties generally, and opposition parties in particular, are allowed to organize freely and run in elections. The seven indicators have been aggregated into the Free Political Parties subattribute using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 1. Representation |
| Aggregation | BFA of 1.1. Credible Elections, 1.3. Free Political Parties, 1.4. Elected Government, 1.5. Effective Parliament, and 1.6. Local Democracy to create a contestation index. Thereafter multiplication of contestation index and 1.2. Inclusive Suffrage. |
| Indicators included | v_13_01, v_13_02, v_13_03, v_13_04, v_13_05, v_13_06, v_13_07 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | free_parties_l = lower bound for the 68% confidence interval free_parties_u = upper bound for the 68% confidence interval |

Elected Government (elected_gov_est)

| | |
|--|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | elected_gov_est |
| Definition | The Elected Government subattribute denotes the extent to which national, governing offices are filled through elections. It is operationalized using eight indicators from BRRD, Freedom House, LIED, Polity and V-Dem. All the indicators have a rather formal focus, which means that they do not assess the quality of elections or fully capture the extent to which reserved domains and undue influence from non-elected groups might in practice restrict elected officials' effective power to govern. The eight indicators were aggregated into the Elected Government subattribute using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 1. Representation |
| Aggregation | BFA of 1.1. Credible Elections, 1.3. Free Political Parties, 1.4. Elected Government, 1.5. Effective Parliament, and 1.6. Local Democracy to create a contestation index. Thereafter multiplication of contestation index and 1.2. Inclusive Suffrage. |
| Indicators included | v_14_01, v_14_02, v_14_03, v_14_04, v_14_05, v_14_06, v_14_07, v_14_08 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | elected_gov_l = lower bound for the 68% confidence interval elected_gov_u = upper bound for the 68% confidence interval |

Effective Parliament (effect_parl_est)

| | |
|-----------------------------------|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | effect_parl_est |
| Definition | The Effective Parliament subattribute denotes the extent to which the legislature is capable of overseeing the executive. It includes three indicators from the V-Dem experts survey that tap fairly directly into the effectiveness of parliament. Another V-Dem indicator on executive oversight and the executive constraints indicator from Polity are included as they capture relevant aspects of institutional representation not covered by other subattributes. The five indicators were aggregated into the Effective Parliament subattribute using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 1. Representation |
| Aggregation | BFA of 1.1. Credible Elections, 1.3. Free Political Parties, 1.4. Elected Government, 1.5. Effective Parliament, and 1.6. Local Democracy to create a contestation index. Thereafter multiplication of contestation index and 1.2. Inclusive Suffrage. |
| Indicators included | v_15_01, v_15_02, v_15_03, v_15_04, v_15_05 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | effect_parl_l = lower bound for the 68% confidence interval effect_parl_u = upper bound for the 68% confidence interval |

Local Democracy (local_dem_est)

| | |
|--|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | local_dem_est |
| Definition | V-Dem is also the only provider of a comprehensive, cross-national data set on subnational elections. The local government index indicates whether the local government is elected and whether it is empowered in relation to the central government, while another indicator assesses the freedom and fairness of subnational elections. A third indicator is used to recode values to zero when there are no local elections. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 1. Representation |
| Aggregation | — |
| Indicators included | v_16_01, v_16_02, v_16_03 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | — |

INDICATORS

EMB autonomy (v_11_01)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2elembaut |
| Name in data set | v_11_01 |
| Definition | <p>Question: Does the election management body (EMB) have autonomy from government to apply election laws and administrative rules impartially in national elections?</p> <p>Responses:</p> <p>0. No. The EMB is controlled by the incumbent government, the military or another de facto ruling body.</p> <p>1. Somewhat. The EMB has some autonomy on some issues but on critical issues that influence the outcome of elections, the EMB is partial towards the de facto ruling body.</p> <p>2. Ambiguous. The EMB has some autonomy but is also partial and it is unclear to what extent this influences the outcome of the election.</p> <p>3. Almost. The EMB has autonomy and acts impartially almost all the time. It may be influenced by the de facto ruling body in some minor ways that do not influence the outcome of elections.</p> <p>4. Yes. The EMB is autonomous and impartially applies elections law and administrative rules.</p> <p>Clarification: The EMB refers to whatever body (or bodies) is charged with administering national elections.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | <p>Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles).</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | 1. Representation 1.1. Credible Elections |
| Aggregation | IRT to construct subattribute 1.1. Credible Elections. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

EMB capacity (v_11_02)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2elembcap |
| Name in data set | v_11_02 |
| Definition | <p>Question: Does the election management body (EMB) have sufficient staff and resources to administer a well-run national election?</p> <p>Responses:</p> <p>0. No. There are glaring deficits in staff, financial, or other resources affecting the organization across the territory.</p> <p>1. Not really. Deficits are not glaring but they nonetheless seriously compromised the organization of administratively well-run elections in many parts of the country.</p> <p>2. Ambiguous. There might be serious deficiencies compromising the organization of the election but it could also be a product of human errors and co-incidence or other factors outside the control of the EMB.</p> <p>3. Mostly. There are partial deficits in resources but these are neither serious nor widespread.</p> <p>4. Yes. The EMB has adequate staff and other resources to administer a well-run election.</p> <p>Clarification: The EMB refers to whatever body (or bodies) is charged with administering national elections.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | <p>Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles).</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | 1. Representation 1.1. Credible Elections |
| Aggregation | IRT to construct subattribute 1.1. Credible Elections. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Election other voting irregularities (v_11_03)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2elirreg |
| Name in data set | v_11_03 |
| Definition | <p>Question: In this national election, was there evidence of other intentional irregularities by incumbent and/or opposition parties and/or vote fraud?</p> <p>Responses:</p> <p>0. Yes. There were systematic and almost nationwide other irregularities.</p> <p>1. Yes, some. There were non-systematic, but fairly common other irregularities, even if only in some parts of the country.</p> <p>2. Sporadic. There were a limited number of sporadic other irregularities and it is not clear whether they were intentional or disadvantaged particular groups.</p> <p>3. Almost none. There were only a limited number of irregularities and many were probably unintentional or did not disadvantage particular groups' access to participation.</p> <p>4. None. There was no evidence of intentional other irregularities. Unintentional irregularities resulting from human error and/or natural conditions may still have occurred.</p> <p>Clarification: Examples include use of double IDs, intentional lack of voting materials, ballot-stuffing, misreporting of votes and false collation of votes. This question does not refer to lack of access to registration, harassment of opposition parties, manipulations of the voter registry or vote-buying (dealt with in previous questions).</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | <p>Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles).</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |

| Aggregation | IRT to construct subattribute 1.1. Credible Elections. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Election government intimidation (v_11_04)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2elintim |
| Name in data set | v_11_04 |
| Definition | <p>Question: In this national election, were opposition candidates/ parties/campaign workers subjected to repression, intimidation, violence or harassment by the government, the ruling party or their agents?</p> <p>Responses:</p> <p>0. Yes. The repression and intimidation by the government or its agents was so strong that the entire period was quiet.</p> <p>1. Yes, frequent. There was systematic, frequent and violent harassment and intimidation of the opposition by the government or its agents during the election period.</p> <p>2. Yes, some. There was periodic, not systematic but possibly centrally coordinated harassment and intimidation of the opposition by the government or its agents.</p> <p>3. Restrained. There were sporadic instances of violent harassment and intimidation by the government or its agents, in at least one part of the country and directed at only one or two local branches of opposition groups.</p> <p>4. None. There was no harassment or intimidation of opposition by the government or its agents throughout the election campaign period and polling day.</p> <p>Clarification: Other types of clearly distinguishable civil violence, even if politically motivated, during the election period should not be factored in when scoring this indicator (it is dealt with separately).</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | <p>Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles).</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | 1. Representation 1.1. Credible Elections |
| Aggregation | IRT to construct subattribute 1.1. Credible Elections. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Election free and fair (v_11_05)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2elfrfair |
| Name in data set | v_11_05 |
| Definition | <p>Question: Taking all aspects of the pre-election period, election day and the post-election process into account, would you consider this national election to be free and fair?</p> <p>Responses:</p> <p>0. No, not at all. The elections were fundamentally flawed and the official results had little if anything to do with the 'will of the people' (i.e. who became president or who won the legislative majority).</p> <p>1. Not really. While the elections allowed for some competition, the irregularities in the end affected the outcome of the election (as defined above).</p> <p>2. Ambiguous. There was substantial competition and freedom of participation but there were also significant irregularities. It is hard to determine whether the irregularities affected the outcome or not (as defined above).</p> <p>3. Yes, somewhat. There were deficiencies and some degree of fraud and irregularity but these did not in the end affect the outcome (as defined above).</p> <p>4. Yes. There was some amount of human error and some logistical restrictions but these were largely unintentional and without significant consequences.</p> <p>Clarification: The only thing that should not be considered in coding this is the extent of suffrage (by law). Thus, a free and fair election may occur even if the law excludes significant groups (an issue measured separately).</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | <p>Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles).</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | 1. Representation 1.1. Credible Elections |
| Aggregation | IRT to construct subattribute 1.1. Credible Elections. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Competition (v_11_06)

| | |
|--|---|
| Data source | LIED |
| Original variable | competitive elections |
| Name in data set | v_11_06 |
| Definition | <p>The chief executive offices and seats in the effective legislative body are filled using elections that are characterized by uncertainty, meaning that the elections are, in principle, sufficiently free to enable the opposition to gain power if they were to attract sufficient support from the electorate. This presumes that control over key executive and legislative offices is determined by elections, the executive and members of the legislature have not been unconstitutionally removed and the legislature has not been dissolved. With respect to the electoral process, this presumes that the constitutional timing of elections has not been violated (in more than a marginal fashion), non-extremist parties are not banned, opposition candidates are generally free to participate, voters experience little systematic coercion in exercising their electoral choice and electoral fraud does not determine who wins. With respect to the outcome, this presumes that the declared winner of executive and legislative elections reflects the votes cast by the electorate, as near as can be determined from extant sources. Incumbent turnover (as a result of multiparty elections) is regarded as a strong indicator of competition but is neither necessary nor sufficient. In addition, reports from outside observers (as reported in books, articles and country reports) are used to determine whether the above-mentioned conditions have been met in a given election. Coding for this variable does not take into account whether there is a level playing field, all contestants gain access to funding and the media, media coverage is unbiased, civil liberties are respected or other features associated with fully free and fair elections are present. Competition therefore sets a modest threshold.</p> |
| Original scale | Nominal |
| Citation | Skaaning, Gerring and Bartusevičius (2015) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 1. Representation 1.1. Credible Elections |
| Aggregation | IRT to construct subattribute 1.1. Credible Elections. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

A3 Electoral process (v_11_07)

| | |
|-----------------------------------|--|
| Data source | FITW |
| Original variable | A3 |
| Name in data set | v_11_07 |
| Definition | Question: Are the electoral laws and framework fair, and are they implemented impartially by the relevant election management bodies? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 1. Representation 1.1. Credible Elections |
| Aggregation | IRT to construct subattribute 1.1. Credible Elections. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

B2 Political pluralism and participation (v_11_08)

| | |
|--|--|
| Data source | FITW |
| Original variable | B2 |
| Name in data set | v_11_08 |
| Definition | Question: Is there a realistic opportunity for the opposition to increase its support or gain power through elections? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 1. Representation 1.1. Credible Elections |
| Aggregation | IRT to construct subattribute 1.1. Credible Elections. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

B3 Political pluralism and participation (v_11_09)

| | |
|--|--|
| Data source | FITW |
| Original variable | B3 |
| Name in data set | v_11_09 |
| Definition | Question: Are the people's political choices free from domination by forces that are external to the political sphere, or by political forces that employ extrapolitical means? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 1. Representation 1.1. Credible Elections |
| Aggregation | IRT to construct subattribute 1.1. Credible Elections. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Free and fair elections (v_11_10)

| | |
|--|---|
| Data source | BTI |
| Original variable | elect |
| Name in data set | v_11_10 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below:</p> <ol style="list-style-type: none"> 1. National elections, if held at all, are entirely unfree and unfair. 2. 3. 4. General elections are held, but serious irregularities during voting process and ballot count occur. The rights to vote, campaign and run for office are restricted, and elections have de facto only limited influence over who governs. 5. 6. 7. General, multiparty elections are held, conducted properly and accepted as the means of filling political posts. However, there are some constraints on the fairness of the elections with regard to registration, campaigning or media access. 8. 9. 10. There are no constraints on free and fair elections. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | <ol style="list-style-type: none"> 1. Representation 1.1. Credible Elections |
| Aggregation | IRT to construct subattribute 1.1. Credible Elections. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Inclusive suffrage (v_12_01)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2elsuffrage |
| Name in data set | v_12_01 |
| Definition | <p>Question: What percentage (%) of adult citizens (as defined by statute) has the legal right to vote in national elections?</p> <p>Responses: Percentage</p> <p>Clarification: This question does not take into consideration restrictions based on age, residence, having been convicted for crime, or being legally incompetent. It covers legal (de jure) restrictions, not restrictions that may be operative in practice (de facto). The adult population (as defined by statute) is defined by citizens in the case of independent countries or the people living in the territorial entity in the case of colonies. Universal suffrage is coded as 100. The scores reflect de jure provisions of suffrage extension in percentage of the adult population. If the suffrage law is revised in a way that affects the extension, the scores reflect this change as of the calendar year the law was enacted.</p> |
| Original scale | 0% to 100% |
| Citation | Coppedge et al. (2025) |
| Data manipulation for aggregation | <p>Re-scaled to vary between 0 and 1.</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | <p>1. Representation</p> <p>1.2. Inclusive Suffrage</p> |
| Aggregation | Weighted average to construct subattribute 1.2. Inclusive Suffrage. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Election voter registry (v_12_02)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2elrgstry |
| Name in data set | v_12_02 |
| Definition | <p>Question: In this national election, was there a reasonably accurate voter registry in place and was it used?</p> <p>Responses:</p> <p>0. No. There was no registry or the registry was not used.</p> <p>1. No. There was a registry but it was fundamentally flawed (meaning 20% or more of eligible voters could have been disenfranchised or the outcome could have been affected significantly by double voting and impersonation).</p> <p>2. Uncertain. There was a registry but it is unclear whether potential flaws in the registry had much impact on electoral outcomes.</p> <p>3. Yes, somewhat. The registry was imperfect but less than 10% of eligible voters may have been disenfranchised, and double-voting and impersonation could not have affected the results significantly.</p> <p>4. Yes. The voter registry was reasonably accurate (less than 1% of voters were affected by any flaws) and it was applied in a reasonable fashion.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | <p>Re-scaled to vary between 0 and 1.</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | <p>1. Representation</p> <p>1.2. Inclusive Suffrage</p> |
| Aggregation | Weighted average to construct subattribute 1.2. Inclusive Suffrage. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Party ban (v_13_01)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2psparban_ord |
| Name in data set | v_13_01 |
| Definition | <p>Question: Are any political parties banned?</p> <p>Responses:</p> <p>0. Yes. All parties except the state-sponsored party (and closely allied parties) are banned.</p> <p>1. Yes. Elections are non-partisan or there are no officially recognized parties.</p> <p>2. Yes. Many parties are banned.</p> <p>3. Yes. But only a few parties are banned.</p> <p>4. No. No parties are officially banned.</p> <p>Clarification: This does not apply to parties that are barred from competing for failing to meet registration requirements or support thresholds.</p> |
| Original scale | Ordinal |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | — |
| Indicator of | <p>1. Representation</p> <p>1.3. Free Political Parties</p> |
| Aggregation | IRT to construct subattribute 1.3. Free Political Parties. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Barriers to parties (v_13_02)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2psbars_ord |
| Name in data set | v_13_02 |
| Definition | <p>Question: How restrictive are the barriers to forming a political party?</p> <p>Responses:</p> <p>0. Parties are not allowed.</p> <p>1. It is impossible, or virtually impossible, for parties not affiliated with the government to form (legally).</p> <p>2. There are significant obstacles (e.g. party leaders face high levels of regular political harassment by authorities).</p> <p>3. There are modest barriers (e.g. party leaders face occasional political harassment by authorities).</p> <p>4. There are no substantial barriers.</p> <p>Clarification: Barriers include legal requirements such as requirements for membership or financial deposits, as well as harassment.</p> |
| Original scale | Ordinal |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | — |
| Indicator of | <p>1. Representation</p> <p>1.3. Free Political Parties</p> |
| Aggregation | IRT to construct subattribute 1.3. Free Political Parties. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Opposition parties' autonomy (v_13_03)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2psoppaut_ord |
| Name in data set | v_13_03 |
| Definition | <p>Question: Are opposition parties independent and autonomous of the ruling regime?</p> <p>Responses:</p> <p>0. Opposition parties are not allowed.</p> <p>1. There are no autonomous, independent opposition parties. Opposition parties are either selected or co-opted by the ruling regime.</p> <p>2. At least some opposition parties are autonomous and independent of the ruling regime.</p> <p>3. Most significant opposition parties are autonomous and independent of the ruling regime.</p> <p>4. All opposition parties are autonomous and independent of the ruling regime.</p> <p>Clarification: An opposition party is any party that is not part of the government—that is, it has no control over the executive.</p> |
| Original scale | Ordinal |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 1. Representation 1.3. Free Political Parties |
| Aggregation | IRT to construct subattribute 1.3. Free Political Parties. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Elections multiparty (v_13_04)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2elmulpar_ord |
| Name in data set | v_13_04 |
| Definition | <p>Question: Was this national election multiparty?</p> <p>Responses:</p> <p>0. No. No-party or single-party and there is no meaningful competition (includes situations where a few political parties are legal but they are all de facto controlled by the dominant party).</p> <p>1. Not really. No-party or single-party (defined as above) but multiple candidates from the same party and/or independents contest legislative seats or the presidency.</p> <p>2. Constrained. At least one real opposition party is allowed to contest but competition is highly constrained, either legally or informally.</p> <p>3. Almost. Elections are multiparty in principle but either one main opposition party is prevented (de jure or de facto) from contesting, or conditions such as civil unrest (excluding natural disasters) prevent competition in a portion of the territory.</p> <p>4. Yes. Elections are multiparty, even though a few marginal parties may not be permitted to contest (e.g. far-right/left extremist parties, or anti-democratic religious or ethnic parties).</p> |
| Original scale | Ordinal |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 1. Representation 1.3. Free Political Parties |
| Aggregation | IRT to construct subattribute 1.3. Free Political Parties. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Competitiveness of participation (v_13_05)

| | |
|-----------------------------------|---|
| Data source | Polity |
| Original variable | parcomp |
| Name in data set | v_13_05 |
| Definition | <p>The competitiveness of participation refers to the extent to which alternative preferences for policy and leadership can be pursued in the political arena. Political competition implies a significant degree of civil interaction, so polities that are coded unregulated (1) on regulation of participation (PARREG, variable 2.5) are not coded for competitiveness. Polities in transition between unregulated and any of the regulated forms on variable 2.5 also are not coded on variable 2.6.</p> <p>Competitiveness is coded on a five-category scale:</p> <ul style="list-style-type: none"> 0. Not applicable. 1. Repressed. 2. Suppressed. 3. Factional. 4. Transitional. 5. Competitive. |
| Original scale | Ordinal |
| Citation | Marshall and Gurr (2020) |
| Data manipulation for aggregation | Codes -99 to -66 treated as missing values. Values for 2019 and following were coded by International IDEA's expert consultants following the original code book by Marshall and Gurr (2020). |
| Indicator of | <ul style="list-style-type: none"> 1. Representation 1.3. Free Political Parties |
| Aggregation | IRT to construct subattribute 1.3. Free Political Parties. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Multiparty elections (v_13_06)

| | |
|-----------------------------------|---|
| Data source | LIED |
| Original variable | multiparty legislative elections |
| Name in data set | v_13_06 |
| Definition | <p>Multiparty legislative elections are defined by the existence of two conditions: legislative elections (LEGSELEC) and opposition (OPPOSITION).</p> <p>LEGSELEC: A legislative body issues at least some laws and does not perform executive functions. The lower house (or unicameral chamber) of the legislature is at least partly elected. The legislature has not been closed.</p> <p>OPPOSITION: The lower house (or unicameral chamber) of the legislature is (at least in part) elected by voters facing more than one choice. Specifically, parties are not banned and either more than one party is allowed to compete or elections are nonpartisan (i.e. all the candidates run without party labels).</p> |
| Original scale | Nominal |
| Citation | Skaaning, Gerring and Bartusevičius (2015) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 1. Representation 1.3. Free Political Parties |
| Aggregation | IRT to construct subattribute 1.3. Free Political Parties. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

B1 Political pluralism and participation (v_13_07)

| | |
|--|---|
| Data source | FITW |
| Original variable | B1 |
| Name in data set | v_13_07 |
| Definition | <p>Question: Do the people have the right to organize in different political parties or other competitive political groupings of their choice, and is the system free of undue obstacles to the rise and fall of these competing parties or groupings?</p> <p>Country scores vary between 0 (worst) and 4 (best).</p> |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | — |
| Indicator of | <p>1. Representation</p> <p>1.3. Free Political Parties</p> |
| Aggregation | IRT to construct subattribute 1.3. Free Political Parties. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Elected executive index (v_14_01)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2x_elecoff |
| Name in data set | v_14_01 |
| Definition | <p>Question: Are the chief executive and legislature appointed through popular elections?</p> <p>Clarifications: This index attempts to measure whether the chief executive is elected, either directly by popular elections or indirectly by a popularly elected legislature that then appoints the chief executive; and whether, in presidential systems with a directly elected president who is also the chief executive, the legislature is directly elected. Note that a popular election is only minimally defined and also includes sham elections with limited suffrage and no competition. Similarly, 'appointment' by legislature only implies selection and/or approval, not the power to dismiss. This index is useful primarily for aggregating higher-order Indices and should not necessarily be interpreted as an important element of democracy in its own right.</p> |
| Original scale | Interval |
| Citation | Coppedge et al. (2025) |
| Data manipulation for aggregation | <p>Recoded into 0, 0.5, 0.95 and 1.</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | <p>1. Representation</p> <p>1.4. Elected Government</p> |
| Aggregation | IRT to construct subattribute 1.4. Elected Government. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Competitiveness of executive recruitment (v_14_02)

| | |
|-----------------------------------|---|
| Data source | Polity |
| Original variable | xrcomp |
| Name in data set | v_14_02 |
| Definition | <p>Competitiveness refers to the extent that prevailing modes of advancement give subordinates equal opportunities to become superordinates. If power transfers are coded unregulated ('1') in the Regulation of Executive Recruitment (variable 3.1), or involve a transition to/from unregulated, competitiveness is coded '0'. Three categories are used to measure this concept:</p> <ol style="list-style-type: none"> 1. Selection. Chief executives are determined by hereditary succession, designation or by a combination of both, as in monarchies where the chief minister is chosen by the king or court. Examples of pure designative selection are: rigged, unopposed elections; repeated replacement of presidents before their terms end; recurrent military selection of civilian executives; selection within an institutionalized single party; recurrent incumbent selection of successors; and repeated election boycotts by the major opposition parties. 2. Dual/Transitional. Dual executives occur where one is chosen by hereditary succession, the other by competitive election. Term also used for transitional arrangements between selection (ascription and/or designation) and competitive election. 3. Election. Chief executives are typically chosen in or through competitive elections involving two or more major parties or candidates. |
| Original scale | Ordinal |
| Citation | Marshall and Gurr (2020) |
| Data manipulation for aggregation | <p>Codes -99 to -66 treated as missing values. Recoded 0 and 1 as 0, 2 as 0.5, and 3 as 1. Values for 2019 and following were coded by International IDEA's expert consultants following the original code book by Marshall and Gurr (2020).</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | 1. Representation 1.4. Elected Government |
| Aggregation | IRT to construct subattribute 1.4. Elected Government. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Openness of executive recruitment (v_14_03)

| | |
|--|--|
| Data source | Polity |
| Original variable | xropen |
| Name in data set | v_14_03 |
| Definition | <p>Recruitment of the chief executive is 'open' to the extent that all the politically active population has an opportunity, in principle, to attain the position through a regularized process. If power transfers are coded unregulated (1) in Regulation of Executive Recruitment (variable 3.1) or involve a transition to/from unregulated, openness is coded 0. Four categories are used:</p> <ol style="list-style-type: none"> 1. Closed. Chief executives are determined by hereditary succession, e.g. kings, emperors, emirs, who assume executive power by right of descent. An executive selected by other means may proclaim himself a monarch but the polity he governs is not coded 'closed' unless a relative succeeds him as ruler. 2. Dual Executive–Designation. Hereditary succession plus executive or court selection of an effective chief minister. 3. Dual Executive–Election. Hereditary succession plus electoral selection of an effective chief minister. 4. Open. Chief executives are chosen by elite designation, competitive election or transitional arrangements between designation and election. |
| Original scale | Ordinal |
| Citation | Marshall and Gurr (2020) |
| Data manipulation for aggregation | <p>Codes -99 to -66 treated as missing values. Recoded 0, 1 and 2 as 0; 3 as 0.5; and 4 as 1. Values for 2019 and following were coded by International IDEA's expert consultants following the original code book by Marshall and Gurr (2020).</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | <p>1. Representation</p> <p>1.4. Elected Government</p> |
| Aggregation | IRT to construct subattribute 1.4. Elected Government. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Electoral (v_14_04)

| | |
|--|--|
| Data source | BRRD |
| Original variable | electoral |
| Name in data set | v_14_04 |
| Definition | Does a country have no regular elections, elections in an effectively one-party state, elections with opposition parties but without an actual chance of government change, or full democracy? Alternative democracy indicator capturing degree of multiparty competition (no elections = 0, single-party elections = 1, non-democratic multiparty elections = 2, democratic elections = 3). |
| Original scale | Ordinal |
| Citation | Bjørnskov and Rode (2025) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 1. Representation 1.4. Elected Government |
| Aggregation | IRT to construct subattribute 1.4. Elected Government. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

A1 Electoral process (v_14_05)

| | |
|--|--|
| Data source | FITW |
| Original variable | A1 |
| Name in data set | v_14_05 |
| Definition | Question: Was the current head of government or other chief national authority elected through free and fair elections? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 1. Representation 1.4. Elected Government |
| Aggregation | IRT to construct subattribute 1.4. Elected Government. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

A2 Electoral process (v_14_06)

| | |
|-----------------------------------|--|
| Data source | FITW |
| Original variable | A2 |
| Name in data set | v_14_06 |
| Definition | Question: Were the current national legislative representatives elected through free and fair elections? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 1. Representation 1.4. Elected Government |
| Aggregation | IRT to construct subattribute 1.4. Elected Government. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

C1 Functioning of government (v_14_07)

| | |
|--|--|
| Data source | FITW |
| Original variable | C1 |
| Name in data set | v_14_07 |
| Definition | Question: Do the freely elected head of government and national legislative representatives determine the policies of the government? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 1. Representation 1.4. Elected Government |
| Aggregation | IRT to construct subattribute 1.4. Elected Government. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Lexical index of electoral democracy (v_14_08)

| | |
|-----------------------------------|---|
| Data source | LIED |
| Original variable | lexical_index_plus |
| Name in data set | v_14_08 |
| Definition | <p>An index built by combining the values of several other variables measured in the LIED data set:</p> <p>0. legislative_election=0 & executive_elections=0 (regime type: non-electoral autocracies).</p> <p>1. legislative_elections=1 or executive_elections=1 & multi-party_legislative_elections=0 (regime type: one-party autocracies, few cases where executive elections are on track but there is no functioning elected parliament).</p> <p>2. legislative_elections=1 & multi-party_legislative_elections=1 & executive_elections=0 (regime type: multiparty autocracies without elected executive—generally because a monarch influences government appointment and removal or foreign powers dominate political decision making or has significant veto powers).</p> <p>3. legislative_elections=1 & multi-party_legislative_elections=1 & executive_elections=1 & competitive_elections=0 (regime type: multiparty autocracies).</p> <p>4. legislative_elections=1 & multi-party_legislative_elections=1 & executive_elections=1 & competitive_elections=1 & male_suffrage=0 (regime type: exclusive democracies).</p> <p>5. legislative_elections=1 & multi-party_legislative_elections=1 & executive_elections=1 & competitive_elections=1 & male_suffrage=1 & female_suffrage=0 (regime type: male democracies).</p> <p>6. legislative_elections=1 & multi-party_legislative_elections=1 & executive_elections=1 & competitive_elections=1 & male_suffrage=1 & female_suffrage=1 & political_liberties=0 (regime type: electoral democracies).</p> <p>7. legislative_elections=1 & multi-party_legislative_elections=1 & executive_elections=1 & competitive_elections=1 & male_suffrage=1 & female_suffrage=1 & political_liberties=1 (regime type: polyarchies).</p> |
| Original scale | Ordinal |
| Citation | Skaaning, Gerring and Bartusevičius (2015) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 1. Representation 1.4. Elected Government |
| Aggregation | IRT to construct subattribute 1.4. Elected Government. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Legislature questions officials in practice (v_15_01)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2lgqstexp |
| Name in data set | v_15_01 |
| Definition | <p>Question: In practice, does the legislature routinely question executive branch officials?</p> <p>Responses:</p> <p>0. No, never or very rarely.</p> <p>1. Yes, routinely.</p> <p>Clarification: 'Question' means, for example, the power of summons through which the head of state or head of government could be forced to explain policies or testify.</p> |
| Original scale | Dichotomous, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | <p>Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles).</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | <p>1. Representation</p> <p>1.5. Effective Parliament</p> |
| Aggregation | IRT to construct subattribute 1.5. Effective Parliament. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Executive oversight (v_15_02)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2lgotovst |
| Name in data set | v_15_02 |
| Definition | <p>Question: If executive branch officials were engaged in unconstitutional, illegal or unethical activity, how likely is it that a body other than the legislature, such as a comptroller general, general prosecutor or ombudsman, would question or investigate them and issue an unfavourable decision or report?</p> <p>Responses:</p> <p>0. Extremely unlikely.</p> <p>1. Unlikely.</p> <p>2. Very uncertain.</p> <p>3. Likely.</p> <p>4. Certain or nearly certain.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | <p>Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles).</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | <p>1. Representation</p> <p>1.5. Effective Parliament</p> |
| Aggregation | IRT to construct subattribute 1.5. Effective Parliament. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Legislature investigates in practice (v_15_03)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2lginvstp |
| Name in data set | v_15_03 |
| Definition | <p>Question: If the executive were engaged in unconstitutional, illegal or unethical activity, how likely is it that a legislative body (perhaps a whole chamber, perhaps a committee, whether aligned with government or opposition) would conduct an investigation that would result in a decision or report that is unfavourable to the executive?</p> <p>Responses:</p> <ol style="list-style-type: none"> 0. Extremely unlikely. 1. Unlikely. 2. As likely as not. 3. Likely. 4. Certain or nearly certain. |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | <p>Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles).</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | <ol style="list-style-type: none"> 1. Representation 1.5. Effective Parliament |
| Aggregation | IRT to construct subattribute 1.5. Effective Parliament. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Legislature opposition parties (v_15_04)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2lgoppart |
| Name in data set | v_15_04 |
| Definition | <p>Question: Are opposition parties (those not in the ruling party or coalition) able to exercise oversight and investigatory functions against the wishes of the governing party or coalition?</p> <p>Responses:</p> <p>0. No, not at all.</p> <p>1. Occasionally.</p> <p>2. Yes, for the most part.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | <p>Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles).</p> <p>Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | <p>1. Representation</p> <p>1.5. Effective Parliament</p> |
| Aggregation | IRT to construct subattribute 1.5. Effective Parliament. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Executive constraints (v_15_05)

| | |
|--|---|
| Data source | Polity |
| Original variable | xconst |
| Name in data set | v_15_05 |
| Definition | <p>Operationally, this variable refers to the extent of institutionalized constraints on the decision-making powers of chief executives, whether individuals or collectivities. Such limitations may be imposed by any 'accountability groups'. In Western democracies these are usually legislatures. Other kinds of accountability groups are the ruling party in a one-party state; councils of nobles or powerful advisers in monarchies; the military in coup-prone polities; and, in many states, a strong, independent judiciary. The concern is therefore with the checks and balances between the various parts of the decision-making process. A seven-category scale is used:</p> <ol style="list-style-type: none"> 1. Unlimited authority. 2. Intermediate category. 3. Slight to moderate limitation on executive authority. 4. Intermediate category. 5. Substantial limitations on executive authority. 6. Intermediate category. 7. Executive party or subordination. |
| Original scale | Ordinal |
| Citation | Marshall and Gurr (2020) |
| Data manipulation for aggregation | <p>Codes -99 to -66 treated as missing values. Values for 2019 and following were coded by International IDEA's expert consultants following the original code book by Marshall and Gurr (2020). Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set.</p> |
| Indicator of | <ol style="list-style-type: none"> 1. Representation 1.5. Effective Parliament |
| Aggregation | IRT to construct subattribute 1.5. Effective Parliament. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Local government index (v_16_01)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2xel_locelec |
| Name in data set | v_16_01 |
| Definition | <p>Question: Are there elected local governments, and—if so—to what extent can they operate without interference from unelected bodies at the local level?</p> <p>Clarification: The lowest score would be reserved for a country that has no elected local governments. A medium score would be accorded a country that has elected local governments but where those governments are subordinate to unelected officials at the local level perhaps appointed by a higher-level body. A high score would be accorded to a country in which local governments are elected and able to operate without restrictions from unelected actors at the local level with the exception of judicial bodies. Naturally, local governments remain subordinate to the regional and national governments.</p> |
| Original scale | Interval |
| Citation | Coppedge et al. (2025) |
| Data manipulation for aggregation | Re-scaled to vary between 0 and 1. |
| Indicator of | 1. Representation 1.6. Local Democracy |
| Aggregation | Multiplication with v_16_02 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Subnational elections free and fair (v_16_02)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2elffelr |
| Name in data set | v_16_02 |
| Definition | <p>Question: Taking all aspects of the pre-election period, election day and the post-election process into account, would you consider subnational elections (regional and local, as previously identified) to be free and fair on average?</p> <p>Responses:</p> <p>0. No, not at all. The elections were fundamentally flawed and the official results had little if anything to do with the 'will of the people' (who won office).</p> <p>1. Not really. While the elections allowed for some competition, the irregularities in the end affected the outcome of the elections (who won office).</p> <p>2. Ambiguous. There was substantial competition and freedom of participation but there were also significant irregularities. It is hard to determine whether the irregularities affected the outcome (who won office).</p> <p>3. Yes, somewhat. There were deficiencies and some degree of fraud and irregularity but these did not in the end affect the outcome (who won office).</p> <p>4. Yes. There were a certain amount of human error and logistical restrictions but these were largely unintentional and without significant consequences.</p> <p>Clarification: This question refers to subnational levels that have elected offices and elections. It does not refer to subnational levels without elected offices and elections. 'Free and fair' refers to all aspects of the election process except the extent of suffrage (by law). Thus, a free and fair election may occur even if the law excludes significant groups (which is measured separately).</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Re-scaled to vary between 0 and 1. |
| Indicator of | 1. Representation 1.6. Local Democracy |
| Aggregation | Multiplication with v_16_01 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Local government elected (v_16_03)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2ellocelc |
| Name in data set | v_16_03 |
| Definition | <p>Question: At the local level, are government (local government) offices elected in practice?</p> <p>Responses:</p> <p>0. Generally, offices at the local level are not elected.</p> <p>1. Generally, the local executive is elected but not the assembly.</p> <p>2. Generally, the local assembly is elected but not the executive.</p> <p>3. Generally, the local executive is elected and there is no assembly.</p> <p>4. Generally, the local assembly is elected and there is no executive.</p> <p>5. Generally, the local executive and assembly are elected.</p> |
| Original scale | Nominal. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | None. |
| Indicator of | <p>1. Representation</p> <p>1.6. Local Democracy</p> |
| Aggregation | None. This indicator is only used to re-code Local Elections to zero when offices at the local level are not elected. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Chapter 2

RIGHTS

Rights is the second of the four attributes of democracy developed for International IDEA's Global State of Democracy Indices. This section of the Codebook provides details about the subattributes, subcomponents and indicators that compose the index of Rights:

1 attribute

- Rights

4 subattributes

- Access to Justice
- Civil Liberties
- Basic Welfare
- Political Equality

8 subcomponents

- Freedom of Expression
- Freedom of the Press
- Freedom of Association and Assembly
- Freedom of Religion
- Freedom of Movement
- Social Group Equality
- Economic Equality
- Gender Equality

75 indicators

ATTRIBUTE

Rights (rights_est)

| | |
|-----------------------------------|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | rights_est |
| Definition | Rights in the form of liberal and social rights support both fair representation and the vertical mechanism of accountability that the second attribute seeks to achieve. This attribute is composed of four subattributes: Access to Justice, Civil Liberties, Basic Welfare, and Political Equality. The four subattributes were aggregated into the Rights index using BFA. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | — |
| Aggregation | — |
| Indicators included | access_just_est, civil_lib_est, basic_welf_est, pol_equal_est |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | rights_l = lower bound for the 68% confidence interval rights_u = upper bound for the 68% confidence interval |

SUBATTRIBUTES

Access to Justice (access_just_est)

| | |
|-----------------------------------|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | access_just_est |
| Definition | The Access to Justice subattribute denotes the extent to which the legal system is fair (i.e. citizens are not subject to arbitrary arrest or detention and have the right to be under the jurisdiction of, and to seek redress from, competent, independent and impartial tribunals without undue delay). It comprises four expert coded variables (V-Dem) that go beyond the independence of courts. The V-Dem indicators are supplemented with an in-house coded CLD measure of the right to a fair trial, a measure of the effective protection of civil rights from BTI, and a measure of due process rights from FITW. The seven indicators were aggregated into the Access to Justice subattribute using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights |
| Aggregation | BFA of 2.1. Access to Justice, 2.2. Civil Liberties, 2.3. Basic Welfare, and 2.4. Political Equality. |
| Indicators included | v_21_01, v_21_02, v_21_03, v_21_04, v_21_05, v_21_06, v_21_07 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | access_just_l = lower bound for the 68% confidence interval access_just_u = upper bound for the 68% confidence interval |

Civil Liberties (civil_lib_est)

| | |
|-----------------------------------|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | civil_lib_est |
| Definition | The Civil Liberties subattribute denotes the extent to which civil rights and liberties are respected. The five civil liberties subcomponents are Freedom of Expression, Freedom of the Press, Freedom of Association and Assembly, Freedom of Religion, and Freedom of Movement, each of which reflects core concepts in the human rights literature. The five subcomponents were aggregated into the Civil Liberties subattribute using BFA. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights |
| Aggregation | BFA of 2.1. Access to Justice, 2.2. Civil Liberties, 2.3. Basic Welfare, and 2.4. Political Equality. |
| Indicators included | free_express_est, free_press_est, free_assoc_assem_est, free_relig_est, free_move_est |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | civil_lib_l = lower bound for the 68% confidence interval civil_lib_u = upper bound for the 68% confidence interval |

Basic Welfare (basic_welf_est)

| | |
|--|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | basic_welf_est |
| Definition | Basic Welfare denotes the extent to which the material and social supports of democracy (e.g. nutrition, healthcare and education) are available. The provision of basic welfare is measured using a number of standard observable human development indicators: infant mortality rate (CME), life expectancy at birth (WPP), healthy life expectancy at age 60 (WHO), supply of kilocalories per person per day (FAO), and average years of schooling (IHME). In addition, two expert-based indicators from V-Dem were included to assess whether everyone in a given society has access to basic education and healthcare. All of these reflect the extent to which the basic needs of the population are being met. The indicators are aggregated into the Basic Welfare index using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights |
| Aggregation | BFA of 2.1. Access to Justice, 2.2. Civil Liberties, 2.3. Basic Welfare, and 2.4. Political Equality. |
| Indicators included | v_23_01, v_23_02, v_23_03, v_23_04, v_23_05, v_23_06, v_23_07, v_23_08, v_23_09 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | basic_welf_l = lower bound for the 68% confidence interval basic_welf_u = upper bound for the 68% confidence interval |

Political Equality (pol_equal_est)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | pol_equal_est |
| Definition | The Political Equality subattribute denotes the extent to which political and social equality between social and economic groups, and genders is realized. The three Political Equality subcomponents are Social Group Equality, Economic Equality, and Gender Equality, all of which reflect core concepts in the human rights literature. The three subcomponents were aggregated into the Political Equality subattribute using BFA. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights |
| Aggregation | BFA of 2.1. Access to Justice, 2.2. Civil Liberties, 2.3. Basic Welfare, and 2.4. Political Equality. |
| Indicators included | soc_grp_equal_est, econ_equal_est, gender_equal_est |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | pol_equal_l = lower bound for the 68% confidence interval pol_equal_u = upper bound for the 68% confidence interval |

SUBCOMPONENTS

Freedom of Expression (*free_express_est*)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | <i>free_express_est</i> |
| Definition | The Freedom of Expression subcomponent is measured using 10 indicators, comprising expert surveys from V-Dem and in-house coded indicators from BTI, CLD, and Freedom House. The questions underlying the BTI, CLD, and some of the Freedom House variables are rather broad, whereas the V-Dem indicators are more specific and refer to the right to openly discuss political issues and express political opinions outside the mass media. Two of them distinguish between freedom of expression for men and for women. Three of the questions from Freedom House (Freedom on the Net) add considerations of the broader information environment to this subcomponent, with particular attention to access to information online. The indicators are aggregated into the Freedom of Expression subcomponent using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights 2.2. Civil Liberties |
| Aggregation | BFA of 2.2.A. Freedom of Expression, 2.2.B. Freedom of the Press, 2.2.C. Freedom of Association and Assembly, 2.2.D. Freedom of Religion, and 2.2.E. Freedom of Movement. |
| Indicators included | <i>v_22_01</i> , <i>v_22_02</i> , <i>v_22_03</i> , <i>v_22_04</i> , <i>v_22_06</i> , <i>v_22_07</i> , <i>v_22_08</i> , <i>v_22_09</i> , <i>v_22_10</i> , <i>v_22_11</i> |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | <i>free_express_l</i> = lower bound for the 68% confidence interval <i>free_express_u</i> = upper bound for the 68% confidence interval |

Freedom of the Press (free_press_est)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | free_press_est |
| Definition | The Freedom of the Press subcomponent is built from nine indicators. Seven of these measures come from V-Dem and measure the extent to which the news media are diverse, honest, critical of the government, and free from censorship (from the government or self-imposed). We add to this a broader measure of media freedom from GMFD, and a measure of the freedom and independence of the media from FITW. The indicators are aggregated into the Freedom of the Press subcomponent using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights 2.2. Civil Liberties |
| Aggregation | BFA of 2.2.A. Freedom of Expression, 2.2.B. Freedom of the Press, 2.2.C. Freedom of Association and Assembly, 2.2.D. Freedom of Religion, and 2.2.E. Freedom of Movement. |
| Indicators included | v_22_12, v_22_13, v_22_14, v_22_15, v_22_16, v_22_17, v_22_18, v_22_19, v_22_20 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | free_press_l = lower bound for the 68% confidence interval free_press_u = upper bound for the 68% confidence interval |

Freedom of Association and Assembly (free_assoc_assem)

| | |
|-----------------------------------|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | free_assoc_assem |
| Definition | Eight indicators from four sources are used to measure Freedom of Association and Assembly. Two indicators from V-Dem measure associational rights for CSOs. One indicator each from V-Dem and FITW focuses on the freedom of peaceful assembly. Two indicators from FITW deal with associational rights for non-governmental organizations and trade unions. The indicators offered by BTI, and CLD cover freedom of assembly as well as freedom of association, where association refers to both civil society organizations and political parties. The indicators are aggregated into the Freedom of Association and Assembly subcomponent using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights 2.2. Civil Liberties |
| Aggregation | BFA of 2.2.A. Freedom of Expression, 2.2.B. Freedom of the Press, 2.2.C. Freedom of Association and Assembly, 2.2.D. Freedom of Religion, and 2.2.E. Freedom of Movement. |
| Indicators included | v_22_21, v_22_22, v_22_23, v_22_24, v_22_28, v_22_29, v_22_30, v_22_31 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | free_assoc_assem_l = lower bound for the 68% confidence interval free_assoc_assem_u = upper bound for the 68% confidence interval |

Freedom of Religion (free_relig_est)

| | |
|-----------------------------------|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | free_relig_est |
| Definition | A separate subcomponent index comprised of two V-Dem general indicators on religious freedom based on expert surveys and two similarly broad in-house coded variables from CLD, and FITW. The four indicators were aggregated into the Freedom of Religion subcomponent using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights 2.2. Civil Liberties |
| Aggregation | BFA of 2.2.A. Freedom of Expression, 2.2.B. Freedom of the Press, 2.2.C. Freedom of Association and Assembly, 2.2.D. Freedom of Religion, and 2.2.E. Freedom of Movement. |
| Indicators included | v_22_32, v_22_33, v_22_34, v_22_36 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | free_relig_l = lower bound for the 68% confidence interval free_relig_u = upper bound for the 68% confidence interval |

Freedom of Movement (free_move_est)

| | |
|--|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | free_move_est |
| Definition | Freedom of Movement was captured by a general, in-house coded indicator from CLD, one in-house coded indicator from FITW, and three, more specific, expert coded indicators from V-Dem that distinguish between foreign and domestic movement and provide assessments of the latter feature for men and women. The five indicators were aggregated into the Freedom of Movement subcomponent using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights 2.2. Civil Liberties |
| Aggregation | BFA of 2.2.A. Freedom of Expression, 2.2.B. Freedom of the Press, 2.2.C. Freedom of Association and Assembly, 2.2.D. Freedom of Religion, and 2.2.E. Freedom of Movement. |
| Indicators included | v_22_41, v_22_42, v_22_43, v_22_44, v_22_47 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | L_SD22D = lower bound for the 68% confidence interval U_SD22D = upper bound for the 68% confidence interval |

Social Group Equality (soc_grp_equal_est)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | soc_grp_equal_est |
| Definition | Five V-Dem expert-coded indicators that reflect social equality are used to measure social group equality with regard to civil liberties and political power distribution. These are supplemented by indicators of equality treatment and political equality from BTI and FITW. The eight indicators were aggregated into the Social Group Equality subcomponent using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights 2.4. Political Equality |
| Aggregation | BFA of 2.4.A. Social Group Equality, 2.4.B. Economic Equality, and 2.4.C. Gender Equality. |
| Indicators included | v_24_01, v_24_02, v_24_03, v_24_04, v_24_05, v_24_06, v_24_07, v_24_08 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | soc_grp_equal_l = lower bound for the 68% confidence interval soc_grp_equal_u = upper bound for the 68% confidence interval |

Economic Equality (econ_equal_est)

| | |
|--|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | econ_equal_est |
| Definition | The Economic Equality subcomponent aggregates four V-Dem indicators that specify dimensions of political exclusion based on economic and geographical characteristics. The index also includes a measure of socio-economic barriers (from BTI) and the Gini coefficient (from SWIID). The six indicators were aggregated into the Economic Equality subcomponent using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights 2.4. Political Equality |
| Aggregation | BFA of 2.4.A. Social Group Equality, 2.4.B. Economic Equality, and 2.4.C. Gender Equality. |
| Indicators included | v_24_09, v_24_10, v_24_11, v_24_12, v_24_13, v_24_14 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | soc_grp_equal_l = lower bound for the 68% confidence interval soc_grp_equal_u = upper bound for the 68% confidence interval |

Gender Equality (gender_equal_est)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | gender_equal_est |
| Definition | The Gender Equality subcomponent is measured through two expert-coded indicators from V-Dem, on power distribution by gender and female participation in civil society organizations, and five observational indicators, on the ratio of female to male mean years of schooling (IHME), the proportion of lower chamber legislators who are female (V-Dem), the gender disaggregated labour force participation rate (women-men, ILO), the share of managerial positions held by women (ILO), and gender disaggregated control of financial accounts (women-men, World Bank). To this we added an index of exclusion by gender (V-Dem), and in-house coded measures of women's empowerment (GGGR). The nine indicators were aggregated into the Gender Equality subcomponent using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights 2.4. Political Equality |
| Aggregation | BFA of 2.4.A. Social Group Equality, 2.4.B. Economic Equality, and 2.4.C. Gender Equality. |
| Indicators included | v_24_15, v_24_16, v_24_17, v_24_18, v_24_19, v_24_22, v_24_23, v_24_24, v_24_25 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | gender_equal_l = lower bound for the 68% confidence interval gender_equal_u = upper bound for the 68% confidence interval |

INDICATORS

Access to justice for men (v_21_01)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2clacjstm |
| Name in data set | v_21_01 |
| Definition | <p>Question: Do men enjoy secure and effective access to justice?</p> <p>Responses:</p> <ol style="list-style-type: none"> 0. Secure and effective access to justice for men is non-existent. 1. Secure and effective access to justice for men is usually not established or widely respected. 2. Secure and effective access to justice for men is inconsistently observed. Minor problems in most cases or occur rather unevenly across different parts of the country. 3. Secure and effective access to justice for men is usually observed. 4. Secure and effective access to justice for men is almost always observed. <p>Clarification: This question specifies the extent to which men can bring cases before the courts without risk to their personal safety, trials are fair and men have effective ability to seek redress if the public authorities violate their rights, including the rights to counsel, defence and appeal. This question does not ask you to assess the relative access to justice for men and women. Thus, it is correct to assign the lowest possible score to a country if men and women enjoy equal but extremely limited access to justice.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.1. Access to Justice |
| Aggregation | IRT to construct subattribute 2.1. Access to Justice. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Access to justice for women (v_21_02)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2clacjstw |
| Name in data set | v_21_02 |
| Definition | <p>Question: Do women enjoy equal, secure and effective access to justice?</p> <p>Responses:</p> <p>0. Secure and effective access to justice for women is non-existent.</p> <p>1. Secure and effective access to justice for women is usually not established or widely respected.</p> <p>2. Secure and effective access to justice for women is inconsistently observed. This question does not ask you to assess the relative access to justice for men and women. Thus, it is correct to assign the lowest possible score to a country if men and women enjoy equal but extremely limited access to justice.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.1. Access to Justice |
| Aggregation | IRT to construct subattribute 2.1. Access to Justice. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Judicial corruption decision (v_21_03)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2jucorrdc |
| Name in data set | v_21_03 |
| Definition | <p>Question: How often do individuals or businesses make undocumented extra payments or bribes in order to speed up or delay a process or to obtain a favourable judicial decision?</p> <p>Responses:</p> <p>0. Always. 1. Usually. 2. About half of the time. 3. Not usually. 4. Never.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | <p>2. Rights</p> <p>2.1. Access to Justice</p> |
| Aggregation | IRT to construct subattribute 2.1. Access to Justice. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Judicial accountability (v_21_04)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2juaccnt |
| Name in data set | v_21_04 |
| Definition | <p>Question: When judges are found responsible for serious misconduct, how often are they removed from their posts or otherwise disciplined?</p> <p>Responses:</p> <p>0. Never.</p> <p>1. Seldom.</p> <p>2. About half of the time.</p> <p>3. Usually.</p> <p>4. Always.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | <p>2. Rights</p> <p>2.1. Access to Justice</p> |
| Aggregation | IRT to construct subattribute 2.1. Access to Justice. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Fair trial (v_21_05)

| | |
|--|---|
| Data source | CLD |
| Original variable | fairtrial |
| Name in data set | v_21_05 |
| Definition | <p>The indicator specifies the extent to which citizens have the right to a fair trial in practice: they are not subjected to arbitrary arrest, detention or exile; and they have the right to recognition as a person before the law; the right to be under the jurisdiction of and seek redress from competent, independent and impartial tribunals; and the right to be heard and to be tried without undue delay if arrested, detained or charged with a criminal offence.</p> <p>Indicator scale:</p> <ol style="list-style-type: none"> 1. Severely restricted. Fair trials are very unlikely. The courts are totally subordinated to the will of government or the justice system is profoundly undermined by arbitrary arrests, incompetence, corruption and intimidation. 2. Substantially restricted. Some elements of fair trials exist but the courts are not fully independent of the government and/or the justice system is characterized by widespread corruption, intimidation and inefficiency. 3. Moderately restricted. The courts are generally independent of the government, but the justice system is characterized by moderate degrees of corruption or inefficiency. 4. Unrestricted. All elements of fair trials are respected. No arbitrary arrests take place; the courts are competent, independent and impartial; and hearings and trials generally follow arrest and charge within a reasonable time. |
| Original scale | Ordinal |
| Citation | Skaaning (2010) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights 2.1. Access to Justice |
| Aggregation | BFA to construct subattribute 2.1. Access to Justice. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

F2 Rule of law (v_21_06)

| | |
|--|--|
| Data source | FITW |
| Original variable | F2 |
| Name in data set | v_21_06 |
| Definition | Question: Does due process prevail in civil and criminal matters? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights 2.1. Access to Justice |
| Aggregation | IRT to construct subattribute 2.1. Access to Justice. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Civil rights (v_21_07)

| | |
|--|--|
| Data source | BTI |
| Original variable | civ_rights |
| Name in data set | v_21_07 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below.</p> <ol style="list-style-type: none"> 1. Civil rights are systematically violated. There are no mechanisms and institutions to protect residents against violations of their rights. 2. 3. 4. Civil rights are codified by law, but even the most rights (i.e. to life, liberty and physical integrity) are violated in practice. Mechanisms and institutions to prosecute, punish and redress violations of civil rights are largely ineffective. 5. 6. 7. Civil rights are codified by law, but are not properly respected and protected. Mechanisms and institutions to prosecute, punish and redress violations of civil rights are in place, but are not consistently effective. 8. 9. 10. Civil rights are codified by law and respected by all state institutions, which actively prevent discrimination. Residents are effectively protected by mechanisms and institutions established to prosecute, punish and redress violations of their rights. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. |
| Indicator of | 2. Rights 2.1. Access to Justice |
| Aggregation | IRT to construct subattribute 2.1. Access to Justice. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Freedom of discussion for women (v_22_01)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2cldiscw |
| Name in data set | v_22_01 |
| Definition | <p>Question: Are women able to openly discuss political issues in private homes and in public spaces?</p> <p>Responses:</p> <p>0. Not respected. Hardly any freedom of expression exists for women. Women are subject to immediate and harsh intervention and harassment for expressing political opinions.</p> <p>1. Weakly respected. Expressions of political opinions by women are frequently exposed to intervention and harassment.</p> <p>2. Somewhat respected. Expressions of political opinions by women are occasionally exposed to intervention and harassment.</p> <p>3. Mostly respected. There are minor restraints on freedom of expression in the private sphere, predominantly limited to a few isolated cases or only linked to soft sanctions. As a rule, however, there is no intervention or harassment if women make political statements.</p> <p>4. Fully respected. Freedom of speech by women in their homes and in public spaces is unrestricted.</p> <p>Clarification: This indicator specifies the extent to which women are able to engage in private discussions, particularly on political issues, in private homes and public spaces, such as restaurants, public transport, sports events or at work, without fear of harassment by other members of the polity or the public authorities. Of interest are restrictions by the government and its agents but also cultural restrictions or customary laws that are enforced by other members of the polity, sometimes in informal ways. This question does not ask you to assess the relative freedom of men and women. Thus, it is correct to assign the lowest possible score to a country where men and women enjoy equal but extremely few rights to freedom of discussion.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.A. Freedom of Expression |
| Aggregation | IRT to construct subcomponent 2.2.A. Freedom of Expression. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Freedom of discussion for men (v_22_02)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2cldiscm |
| Name in data set | v_22_02 |
| Definition | <p>Question: Are men able to openly discuss political issues in private homes and in public spaces?</p> <p>Responses:</p> <p>0. Not respected. Hardly any freedom of expression exists for men. Men are subject to immediate and harsh intervention and harassment for expression of political opinions.</p> <p>1. Weakly respected. | Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Limits on content (v_22_07)

| | |
|--|---|
| Data source | FOTN |
| Original variable | B |
| Name in data set | v_22_07 |
| Definition | This composite measure 'analyzes legal regulations on content; technical filtering and blocking of websites; other forms of censorship and self-censorship; the vibrancy and diversity of online information space; and the use of digital tools for civic mobilization'. Scores vary between 0 and 35. |
| Original scale | Interval |
| Citation | Freedom House (2024) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.A. Freedom of Expression |
| Aggregation | IRT to construct subcomponent 2.2.A. Freedom of Expression. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Violations of user rights (v_22_08)

| | |
|-----------------------------------|---|
| Data source | FOTN |
| Original variable | C |
| Name in data set | v_22_08 |
| Definition | This composite measure 'tackles legal protections and restrictions on free expression; surveillance and privacy; and legal and extralegal repercussions for online speech and activities, such as imprisonment, cyberattacks, or extralegal harassment and physical violence'. Scores vary between 0 and 40. |
| Original scale | Interval |
| Citation | Freedom House (2024) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.A. Freedom of Expression |
| Aggregation | IRT to construct subcomponent 2.2.A. Freedom of Expression. |

| Aggregation | IRT to construct subcomponent 2.2.A. Freedom of Expression. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Freedom of expression (v_22_11)

| | |
|--|--|
| Data source | BTI |
| Original variable | express |
| Name in data set | v_22_11 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below.</p> <ol style="list-style-type: none"> 1. Freedom of expression is denied. Independent media do not exist or are prohibited. 2. 3. 4. Freedom of expression is often subject to interference or government restrictions. Distortion and manipulation shape matters of public debate. 5. 6. 7. Freedom of expression is occasionally subject to interference or government restrictions, but there are generally no incidents of blatant intrusions like outright state censorship or media shutdowns. 8. 9. 10. Freedom of expression is guaranteed against interference or government restrictions. Individuals, groups and the press can fully exercise these rights. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. |
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.A. Freedom of Expression |
| Aggregation | IRT to construct subcomponent 2.2.A. Freedom of Expression. |

Print/broadcast censorship effort (v_22_12)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2mecenefm |
| Name in data set | v_22_12 |
| Definition | <p>Question: Does the government directly or indirectly attempt to censor the print or broadcast media?</p> <p>Responses:</p> <ol style="list-style-type: none"> 0. Attempts to censor are direct and routine. 1. Attempts to censor are indirect but nonetheless routine. 2. Attempts to censor are direct but limited to especially sensitive issues. 3. Attempts to censor are indirect and limited to especially sensitive issues. 4. The government rarely attempts to censor major media in any way and when such exceptional attempts are discovered, the responsible officials are usually punished. <p>Clarification: Indirect forms of censorship might include politically motivated awarding of broadcast frequencies, withdrawal of financial support, influence over printing facilities and distribution networks, selected distribution of advertising, onerous registration requirements, prohibitive tariffs and bribery. Censorship of non-political topics such as child pornography, statements offensive to a particular religion or defamatory speech are not relevant unless used as a pretext for censoring political speech.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.B. Freedom of the Press |
| Aggregation | IRT to construct subcomponent 2.2.B. Freedom of the Press. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Harassment of journalists (v_22_13)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2meharjrn |
| Name in data set | v_22_13 |
| Definition | <p>Question: Are individual journalists harassed; that is, threatened with libel, arrested, imprisoned, beaten or killed, by governmental or powerful non-governmental actors while engaged in legitimate journalistic activities?</p> <p>Responses:</p> <p>0. Journalists do not dare to engage in journalistic activities that would offend powerful actors because harassment or worse would be certain to occur.</p> <p>1. Some journalists occasionally offend powerful actors but they are almost always harassed or worse and eventually forced to stop.</p> <p>2. Some journalists who offend powerful actors are forced to stop but others manage to continue practising journalism freely for long periods of time.</p> <p>3. It is rare for any journalist to be harassed for offending powerful actors and if this were to happen, those responsible for the harassment would be identified and punished.</p> <p>4. Journalists are never harassed by governmental or powerful non-governmental actors while engaged in legitimate journalistic activities.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.B. Freedom of the Press |
| Aggregation | IRT to construct subcomponent 2.2.B. Freedom of the Press. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Media self-censorship (v_22_14)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2meslfcen |
| Name in data set | v_22_14 |
| Definition | <p>Question: Is there self-censorship among journalists when reporting on issues that the government considers politically sensitive?</p> <p>Responses:</p> <p>0. Self-censorship is complete and thorough.</p> <p>1. Self-censorship is common but incomplete.</p> <p>2. There is self-censorship on a few highly sensitive political issues but not on moderately sensitive issues.</p> <p>3. There is little or no self-censorship among journalists.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | <p>2. Rights</p> <p>2.2. Civil Liberties</p> <p>2.2.B. Freedom of the Press</p> |
| Aggregation | IRT to construct subcomponent 2.2.B. Freedom of the Press. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Critical print/broadcast media (v_22_15)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2mecrit |
| Name in data set | v_22_15 |
| Definition | <p>Question: Of the major print and broadcast outlets, how many routinely criticize the government?</p> <p>Responses:</p> <p>0. None.</p> <p>1. Only a few marginal outlets.</p> <p>2. Some important outlets routinely criticize the government but there are other important outlets that never do.</p> <p>3. All major media outlets criticize the government, at least occasionally.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | <p>2. Rights</p> <p>2.2. Civil Liberties</p> <p>2.2.B. Freedom of the Press</p> |
| Aggregation | IRT to construct subcomponent 2.2.B. Freedom of the Press. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Print/broadcast media perspectives (v_22_16)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2merange |
| Name in data set | v_22_16 |
| Definition | <p>Question: Do the major print and broadcast media represent a wide range of political perspectives?</p> <p>Responses:</p> <p>0. The major media represent only the government's perspective.</p> <p>1. The major media represent only the perspectives of the government and a government-approved, semi-official opposition party.</p> <p>2. The major media represent a variety of political perspectives but they systematically ignore at least one political perspective that is important in this society.</p> <p>3. All perspectives that are important in this society are represented in at least one of the major media.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | <p>2. Rights</p> <p>2.2. Civil Liberties</p> <p>2.2.B. Freedom of the Press</p> |
| Aggregation | IRT to construct subcomponent 2.2.B. Freedom of the Press. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Media bias (v_22_17)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2mebias |
| Name in data set | v_22_17 |
| Definition | <p>Question: Is there media bias against opposition parties or candidates?</p> <p>Responses:</p> <p>0. The print and broadcast media cover only the official party or candidates, or have no political coverage; or there are no opposition parties or candidates to cover.</p> <p>1. The print and broadcast media cover more than just the official party or candidates but all the opposition parties or candidates receive only negative coverage.</p> <p>2. The print and broadcast media cover some opposition parties or candidates more or less impartially, but they give only negative or no coverage to at least one newsworthy party or candidate.</p> <p>3. The print and broadcast media cover opposition parties or candidates more or less impartially, but they give an exaggerated amount of coverage to the governing party or candidates.</p> <p>4. The print and broadcast media cover all newsworthy parties and candidates more or less impartially and in proportion to their newsworthiness.</p> <p>Clarification: Take particular care in rating the year-to-year variation on this question if media bias tends to increase or decrease in election years. Coverage can be considered 'more or less impartial' when the media as a whole presents a mix of positive and negative coverage of each party or candidate.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.B. Freedom of the Press |
| Aggregation | IRT to construct subcomponent 2.2.B. Freedom of the Press. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Media corrupt (v_22_18)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2mecorrupt |
| Name in data set | v_22_18 |
| Definition | <p>Question: Do journalists, publishers or broadcasters accept payments in exchange for altering news coverage?</p> <p>Responses:</p> <p>0. The media are so closely directed by the government that any such payments would be either unnecessary to ensure pro-government coverage or ineffective in producing anti-government coverage.</p> <p>1. Journalists, publishers and broadcasters routinely alter news coverage in exchange for payments.</p> <p>2. It is common, but not routine, for journalists, publishers and broadcasters to alter news coverage in exchange for payments.</p> <p>3. It is not normal for journalists, publishers and broadcasters to alter news coverage in exchange for payments, but it happens occasionally without anyone being punished.</p> <p>4. Journalists, publishers and broadcasters rarely alter news coverage in exchange for payments and if it becomes known, someone is punished for it.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.B. Freedom of the Press |
| Aggregation | IRT to construct subcomponent 2.2.B. Freedom of the Press. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Media freedom (v_22_19)

| | |
|--|--|
| Data source | GMFD |
| Original variable | Media freedom |
| Name in data set | v_22_19 |
| Definition | <p>The media environments around the world are sorted into three basic categories:</p> <ol style="list-style-type: none"> 1. Free. Countries where criticism of the government and government officials is a common and normal part of the political dialogue in the mediated public sphere. 2. Imperfectly free. Countries where the social, legal or economic costs related to criticism of the government or government officials limit public criticism, but investigative journalism and criticism of major policy failings can and do occur. 3. Not free. Countries where it is not possible to safely criticize government or government officials. <p>Clarification: In the original data set (Van Belle 2000), there were four categories. Category 4 meant that the government directly controlled all news media, whereas category 3 meant that the government exerted indirect control. Since the end of the Cold War and with the massive growth in information technology, distinguishing between state-operated news media and media controlled by other means became something of a pointless exercise.</p> |
| Original scale | Ordinal |
| Citation | Whitten-Woodring and Van Belle (2017) |
| Data manipulation for aggregation | The scale is inverted so that higher values denote better performance. |
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.B. Freedom of the Press |
| Aggregation | IRT to construct subcomponent 2.2.B. Freedom of the Press. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

D1 Freedom of expression and belief (v_22_20)

| | |
|--|--|
| Data source | FITW |
| Original variable | D1 |
| Name in data set | v_22_20 |
| Definition | Question: Are there free and independent media? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.B. Freedom of the Press |
| Aggregation | IRT to construct subcomponent 2.2.B. Freedom of the Press. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

CSO entry and exit (v_22_21)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2cseeorgs |
| Name in data set | v_22_21 |
| Definition | <p>Question: To what extent does the government achieve control over entry and exit by civil society organizations (CSOs) into public life?</p> <p>Responses:</p> <p>0. Monopolistic control. The government exercises an explicit monopoly over CSOs. The only organizations allowed to engage in political activity, such as endorsing parties or politicians, sponsoring public issue forums, organizing rallies or demonstrations, engaging in strikes or publicly commenting on public officials and policies, are government-sponsored organizations. The government actively represses those who attempt to defy its monopoly on political activity.</p> <p>1. Substantial control. The government licenses all CSOs and uses political criteria to bar organizations that are likely to oppose the government. There are at least some citizen-based organizations that play a limited role in politics independent of the government. The government actively represses those who attempt to flout its political criteria and bars them from any political activity.</p> <p>2. Moderate control. Whether the government ban on independent CSOs is partial or full, some prohibited organizations manage to play an active political role. Despite its ban on organizations of this sort, the government does not or cannot repress them, due to either its weakness or political expediency.</p> <p>3. Minimal control. Regardless of whether the government licenses CSOs, constitutional provisions exist that allow the government to ban organizations or movements that have a history of anti-democratic action (e.g. the banning of neo-fascist or communist organizations in the Federal Republic of Germany). Such bans take place within the rule of law and conditions of judicial independence.</p> <p>4. Unconstrained. Regardless of whether the government licenses CSOs, the government does not impede their formation and operation unless they are engaged in activities that seek to violently overthrow the government.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.C. Freedom of Association and Assembly |
| Aggregation | IRT to construct subcomponent 2.2.C. Freedom of Association and Assembly. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

CSO repression (v_22_22)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2csreprss |
| Name in data set | v_22_22 |
| Definition | <p>Question: Does the government attempt to repress civil society organizations?</p> <p>Responses:</p> <p>0. Severely. The government violently and actively pursues all real and some imagined members of CSOs, seeking not just to deter the activity of such groups but effectively to liquidate them. Examples include Stalinist Russia, Nazi Germany and Maoist China.</p> <p>1. Substantially. In addition to the kinds of harassment outlined in responses 2 and 3 below, the government also arrests, tries and imprisons leaders of and participants in opposition CSOs that are not acting unlawfully. Other sanctions include disruption of public gatherings and violent sanctions of activists such as beatings, threats to family members and destruction of valuable property. Examples include Mugabe's Zimbabwe, Poland under Martial Law and Serbia under Milosevic.</p> <p>2. Moderately. In addition to the material sanctions outlined in response 3, the government also engages in minor legal harassment such as detentions or short-term incarceration to dissuade CSOs from acting or expressing themselves. The government may also restrict the scope of CSOs' actions through measures that restrict the association of such organizations with each other or political parties, bar CSOs from taking certain actions or block international contacts. Examples include post-Martial Law Poland, Brazil in the early 1980s and the late Franco period in Spain.</p> <p>3. Weakly. The government uses material sanctions such as fines, firings and denial of social services, to deter oppositional CSOs from acting or expressing themselves. They may also use burdensome registration or incorporation procedures to slow the formation of new CSOs and sidetrack them from engagement. The government may also organize government organized movements or NGOs (GONGOs) to crowd out independent organizations. Examples include Singapore in the post-Yew phase or Putin's Russia.</p> <p>4. No. Civil society organizations are free to organize, associate, strike, express themselves and criticize the government without fear of government sanction or harassment.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |

| | |
|---------------------|---|
| Indicator of | 2. Rights 2.2. Civil Liberties 2.2.C. Freedom of Association and Assembly |
| Aggregation | IRT to construct subcomponent 2.2.C. Freedom of Association and Assembly. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Freedom of peaceful assembly (v_22_23)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2caassemb |
| Name in data set | v_22_23 |
| Definition | <p>Question: To what extent do state authorities respect and protect the right of peaceful assembly?</p> <p>Responses:</p> <p>0. Never. State authorities do not allow peaceful assemblies and are willing to use lethal force to prevent them.</p> <p>1. Rarely. State authorities rarely allow peaceful assemblies, but generally avoid using lethal force to prevent them.</p> <p>2. Sometimes. State authorities sometimes allow peaceful assemblies, but often arbitrarily deny citizens the right to assemble peacefully.</p> <p>3. Mostly. State authorities generally allow peaceful assemblies, but in rare cases arbitrarily deny citizens the right to assemble peacefully.</p> <p>4. Almost always. State authorities almost always allow and actively protect peaceful assemblies except in rare cases of lawful, necessary, and proportionate limitations.</p> <p>Clarification: This question focuses on the ability to assemble publicly in practice. An assembly is 'an intentional and temporary presence of a number of individuals in a public place, for a common expressive purpose' (Belyaeva et al. 2010). Authorities may limit the right to assembly only if limitations are necessary in the interests of national security or public safety, public order, the protection of public health or morals, or the protection of the rights and freedoms of others, and are lawful, necessary and proportionate to the aim pursued. Such reasonable and legal restrictions should not be considered when answering. However, if there is evidence that restrictions are used as a pretext for political reasons, this evidence should be considered.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |

| Aggregation | IRT to construct subcomponent 2.2.C. Freedom of Association and Assembly. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Freedom of assembly and association (v_22_24)

| | |
|--|--|
| Data source | CLD |
| Original variable | freass |
| Name in data set | v_22_24 |
| Definition | <p>The extent to which individuals and groups have freedom of assembly and association, that is, the right of citizens to gather freely and carry out peaceful demonstrations as well as to join, form and participate with other persons in political parties, cultural organizations, trade unions or the like of their own volition without being subject to limitations or restrictions.</p> <p>Component scale:</p> <ol style="list-style-type: none"> 1. Severely restricted. Hardly any freedom of association and assembly exists. As a rule, politically relevant civic organizations and attempts at assembly do not exist or are harshly suppressed. 2. Fairly restricted. Some elements of civic organizations exist, but oppositional organizations of relevance to governance are prohibited, disabled or systematically repressed, and demonstrations critical of the government exposed to numerous interventions and prohibitions. 3. Modestly restricted. There are minor restraints on the freedom of association and/or assembly, predominantly limited to a few isolated cases, but as a rule there are no interventions or prohibitions on parties, social organizations or public meetings. 4. Unrestricted. There is unrestricted freedom of association and assembly. |

Freedom of religion (v_22_32)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2clrelig_ord |
| Name in data set | v_22_32 |
| Definition | <p>Question: Is there freedom of religion?</p> <p>Responses:</p> <p>0. Not respected by the public authorities. Hardly any freedom of religion exists. Any kind of religious practice is outlawed or at least controlled by the government to the extent that religious leaders are appointed by and subjected to the public authorities, which control the activities of religious communities in some detail.</p> <p>1. Weakly respected by the public authorities. Some elements of autonomous organized religious practices exist and are officially recognized but significant religious communities are repressed, prohibited or systematically disabled; voluntary conversions are restricted; and instances of discrimination or intimidation of individuals or groups due to their religion are common.</p> <p>2. Somewhat respected by the public authorities. Autonomous organized religious practices exist and are officially recognized. Minor religious communities are repressed, prohibited or systematically disabled, however, and/or there are occasional instances of discrimination or intimidation of individuals or groups based on their religion.</p> <p>3. Mostly respected by the public authorities. There are minor restrictions on the freedom of religion, predominantly limited to a few isolated cases. Minority religions face denial of registration, hindrance of foreign missionaries from entering the country, restrictions on proselytizing or hindrances to accessing the construction of places of worship.</p> <p>4. Fully respected by the public authorities. The population enjoys the right to practice any religious belief they choose. Religious groups may organize, select and train personnel; solicit and receive contributions; publish; and engage in consultations without undue interference. If religious communities have to register, the public authorities do not abuse the process to discriminate against a religion and do not constrain the right to worship before registration.</p> <p>Clarification: This indicator specifies the extent to which individuals and groups have the right to choose a religion, change their religion and practice that religion in private or in public as well as to proselytize peacefully without being subject to restrictions by the public authorities.</p> |

Religious organization repression (v_22_33)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2csrlgprep_ord |
| Name in data set | v_22_33 |
| Definition | <p>Question: Does the government attempt to repress religious organizations?</p> <p>Responses:</p> <p>0. Severely. The government violently and actively pursues all real and some imagined members of religious organizations. It seeks not just to deter the activity of such groups but effectively to liquidate them. Examples include Stalinist Russia and Maoist China.</p> <p>1. Substantially. In addition to the kinds of harassment outlined in 2 and 3 below, the government also arrests, tries and imprisons leaders of and participants in oppositional religious organizations that have not acted unlawfully. Other sanctions include disruption of public gatherings and violent sanctions of activists, such as beatings, threats to families and destruction of valuable property.</p> <p>2. Moderately. In addition to the material sanctions outlined in 3 below, the government also engages in minor legal harassment such as detentions or short-term incarceration to dissuade religious organizations from acting or their members from expressing themselves. The government may also restrict the scope of their actions through measures that restrict the association of religious CSOs with each other or political parties, bar religious CSOs from taking certain actions or block international contacts.</p> <p>3. Weakly. The government uses material sanctions such as fines, firings or the denial of social services to deter oppositional religious organizations from acting or their members from expressing themselves. They may also use burdensome registration or incorporation procedures to slow the formation of new religious CSOs and sidetrack them from engagement. The government may also organize parallel religious organizations to crowd out independent religious organizations.</p> <p>4. No. Religious CSOs are free to organize, associate, strike or express themselves and to criticize the government without fear of government sanctions or harassment.</p> |

Freedom of thought, conscience and religion (v_22_34)

| | |
|--|---|
| Data source | CLD |
| Original variable | frerel |
| Name in data set | v_22_34 |
| Definition | <p>The extent to which individuals and groups have freedom of thought, conscience and religion, that is, the right of citizens to have a religion or change their religion or belief of their own volition; and alone or in community manifest their religion or belief in practice, through worship, observance and teaching in private or public, as well as to proselytize peacefully without being subject to limitations or restrictions.</p> <p>Component scale:</p> <ol style="list-style-type: none"> 1. Severely restricted. Hardly any freedom of religion exists. As a rule, any kind of religious practice is controlled by the government and harshly suppressed. 2. Fairly restricted. Some elements of autonomous organized religious practice exist and are officially recognized, but major religious movements are repressed, prohibited or systematically disabled. 3. Modestly restricted. There are minor restraints on the freedom of religion, predominantly limited to a few isolated cases, but as a rule there are no interventions or prohibitions on communities or individual worshippers. 4. Unrestricted. Unhampered freedom of religion exists. |

Freedom of foreign movement (v_22_41)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2clmove_ord |
| Name in data set | v_22_41 |
| Definition | <p>Question: Is there freedom of foreign travel and emigration?</p> <p>Responses:</p> <p>0. Not respected by the public authorities. Citizens are rarely allowed to emigrate or travel out of the country. Transgressors (or their families) are severely punished. People discredited by the public authorities are routinely exiled or prohibited from travelling.</p> <p>1. Weakly respected by the public authorities. The public authorities systematically restrict the right to travel, especially for political opponents or particular social groups. This can take the form of general restrictions on the duration of stays abroad or delays/refusals of visas.</p> <p>2. Somewhat respected by the public authorities. The right to travel for leading political opponents or particular social groups is occasionally restricted but ordinary citizens only face minor restrictions.</p> <p>3. Mostly respected by the public authorities. Limitations on freedom of movement and residence are not directed at political opponents but minor restrictions exist. For example, exit visas may be required and citizens may be prohibited from travelling outside the country when accompanied by other members of their family.</p> <p>4. Fully respected by the government. The freedom of citizens to travel from and to the country, and to emigrate and repatriate, is not restricted by the public authorities.</p> <p>Clarification: This indicator specifies the extent to which citizens are able to travel freely to and from the country and to emigrate without being subject to restrictions by the public authorities.</p> |

Freedom of domestic movement for women (v_22_42)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2cldmovew_ord |
| Name in data set | v_22_42 |
| Definition | <p>Question: Do women enjoy freedom of movement within the country?</p> <p>Responses:</p> <p>0. Virtually no women enjoy full freedom of movement (e.g. North Korea or Afghanistan under the Taliban).</p> <p>1. Some women enjoy full freedom of movement but most do not (e.g. Apartheid South Africa).</p> <p>2. Most women enjoy some freedom of movement but a sizeable minority does not. Alternatively, all women enjoy partial freedom of movement.</p> <p>3. Most women enjoy full freedom of movement but a small minority does not.</p> <p>4. Virtually all women enjoy full freedom of movement.</p> <p>Clarification: This indicator specifies the extent to which all women are able to move freely, in daytime and at night, in public thoroughfares and across regions within a country, and to establish permanent residence where they wish. Note that restrictions of movement might be imposed by the state and/or by informal norms and practices. Such restrictions sometimes fall on rural residents, on specific social groups or on dissidents. This question does not ask you to assess the relative freedom of men and women. Thus, it is correct to assign the lowest possible score to a country if men and women enjoy equal but extremely low levels of freedom of movement. Do not consider restrictions on movement that are placed on non-political criminals. Do not consider restrictions on movement that result from crime or unrest.</p> |

Infant mortality rate (v_23_01)

| | |
|-----------------------------------|---|
| Data source | CME |
| Original name | Infant mortality rate (per 1,000 live births) |
| Name in data set | v_23_01 |
| Definition | The probability that a child born in a specific year will die before reaching the age of one, if subject to current age-specific mortality rates. Expressed as a rate per 1,000 live births. |
| Original scale | Interval |
| Citation | UN Inter-agency Group for Child Mortality Estimation (n.d.) |
| Data manipulation for aggregation | Missing values have been imputed through Stineman interpolation within countries using the information from the years with valid values. Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles) and then inverted. |
| Indicator of | 2. Rights 2.3. Basic Welfare |
| Aggregation | IRT to construct subattribute 2.3. Basic Welfare. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Life expectancy at birth (v_23_02)

| | |
|--|---|
| Data source | WPP |
| Original name | LE00 |
| Name in data set | v_23_02 |
| Definition | The average number of years a newborn child would live if current mortality patterns were to stay the same. |
| Original scale | Interval |
| Citation | UN Department of Economic and Social Affairs (2024b) |
| Data manipulation for aggregation | Missing values have been imputed through Stineman interpolation within countries using the information from the years with valid values. Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.3. Basic Welfare |
| Aggregation | IRT to construct subattribute 2.3. Basic Welfare. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Kilocalories per person per day (v_23_03)

| | |
|--|--|
| Data source | FAO |
| Original name | Grand total – kcal/capita/day |
| Name in data set | v_23_03 |
| Definition | Calorie supply per capita is the amount of food available for consumption, measured in kilocalories per capita per day. This figure is reached by dividing the total available food supply for human consumption by the population. This data set tracks the calorie supply per capita in each country for calories available from crop products. Although these figures can be taken as the average supply available for consumption, actual consumption by individuals can vary greatly. |
| Original scale | Interval |
| Citation | UN FAO (2024) |
| Data manipulation for aggregation | Recoded into 5 levels taking note of the skewed distribution: less than 1,750 kilocalories per capita per day = 1, 1,750 to 1,999 = 2, 2,000 to 2,249 = 3, 2,250 to 2,500 = 4, greater than 2,500 = 5 . Values for 2023 and 2024 have been imputed by carrying forward values from 2022. |
| Indicator of | 2. Rights 2.3. Basic Welfare |
| Aggregation | IRT to construct subattribute 2.3. Basic Welfare. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Mean years of schooling for males (v_23_04)

| | |
|--|---|
| Data source | IHME |
| Original name | mean_years (Male) |
| Name in data set | v_23_04 |
| Definition | Average years of education for males between ages 25 and 29. Age-standardized aggregates use model populations to control for differences in age structure across time and geography. The population-weighted aggregates use IHME population estimates to create average values for the groups in question. |
| Original scale | Interval |
| Citation | IHME (2020) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.3. Basic Welfare |
| Aggregation | IRT to construct subattribute 2.3. Basic Welfare. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Mean years of schooling for females (v_23_05)

| | |
|-----------------------------------|---|
| Data source | IHME |
| Original name | mean_years (Female) |
| Name in data set | v_23_05 |
| Definition | Average years of education for females between ages 25 and 29. Age-standardized aggregates use model populations to control for differences in age structure across time and geography. The population-weighted aggregates use IHME population estimates to create average values for the groups in question. |
| Original scale | Interval |
| Citation | IHME (2020) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.3. Basic Welfare |
| Aggregation | IRT to construct subattribute 2.3. Basic Welfare. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Educational equality (v_23_06)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2peedueq |
| Name in data set | v_23_06 |
| Definition | <p>Question: To what extent is high quality basic education guaranteed to all, sufficient to enable them to exercise their basic rights as adult citizens?</p> <p>Responses:</p> <p>0. Extreme. Provision of high-quality basic education is extremely unequal and at least 75% of children receive education of such low quality that it undermines their ability to exercise their basic rights as adult citizens.</p> <p>1. Unequal. Provision of high-quality basic education is extremely unequal and at least 25% of children receive education of such low quality that it undermines their ability to exercise their basic rights as adult citizens.</p> <p>2. Somewhat equal. Basic education is relatively equal in quality but 10–25% of children receive education of such low quality that it undermines their ability to exercise their basic rights as adult citizens.</p> <p>3. Relatively equal. Basic education overall is equal in quality but 5–10% of children receive education of such low quality that it probably undermines their ability to exercise their basic rights as adult citizens.</p> <p>4. Equal. Basic education is equal in quality and less than 5% of children receive education of such low quality that it probably undermines their ability to exercise their basic rights as adult citizens.</p> <p>Clarification: Basic education typically refers to schooling between 6 and 16 years of age but this varies slightly among countries.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.3. Basic Welfare |
| Aggregation | IRT to construct subattribute 2.3. Basic Welfare. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Health equality (v_23_07)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2pehealth |
| Name in data set | v_23_07 |
| Definition | <p>Question: To what extent is high quality basic healthcare guaranteed to all, sufficient to enable them to exercise their basic political rights as adult citizens?</p> <p>Responses:</p> <p>0. Extreme. Because of poor quality healthcare, at least 75% of citizens' ability to exercise their political rights as adult citizens is undermined.</p> <p>1. Unequal. Because of poor quality healthcare, at least 25% of citizens' ability to exercise their political rights as adult citizens is undermined.</p> <p>2. Somewhat equal. Because of poor quality healthcare, 10–25% of citizens' ability to exercise their political rights as adult citizens is undermined.</p> <p>3. Relatively equal. Basic healthcare overall is equal in quality but because of poor quality healthcare, 5–10% of citizens' ability to exercise their political rights as adult citizens is undermined.</p> <p>4. Equal. Basic healthcare is equal in quality and less than 5% of citizens cannot exercise their basic political rights as adult citizens.</p> <p>Clarification: Poor quality healthcare can leave citizens unable to exercise their basic rights as adult citizens by failing to adequately treat preventable and treatable illnesses that render them unable to work, participate in social or political organizations, or vote (where voting is allowed).</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |

| Indicator of | 2. Rights 2.3. Basic Welfare |
| Aggregation | IRT to construct subattribute 2.3. Basic Welfare. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Healthy life expectancy at 60 – Male (v_23_08)

| | |
|--|---|
| Data source | WHO |
| Original variable | WHOSIS_000007 (Male) |
| Name in data set | v_23_08 |
| Definition | <p>The average number of years in full health a person (usually at age 60) can expect to live based on current rates of ill-health and mortality.</p> <p>The equivalent lost healthy year fractions required for the HALE calculation are estimated as the all-cause years lost due to disability (YLD) rate per capita, adjusted for independent comorbidity, by age, sex and country. Sullivan's method uses the equivalent lost healthy year fraction (adjusted for comorbidity) at each age in the current population (for a given year) to divide the hypothetical years of life lived by a period life table cohort at different ages into years of equivalent full health and equivalent lost healthy years.</p> |
| Original scale | Interval |
| Citation | WHO (n.d.) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.3. Basic Welfare |
| Aggregation | IRT to construct subattribute 2.3. Basic Welfare. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Healthy life expectancy at 60 – Female (v_23_09)

| | |
|-----------------------------------|---|
| Data source | WHO |
| Original variable | WHOSIS_000007 (Female) |
| Name in data set | v_23_09 |
| Definition | <p>The average number of years in full health a person (usually at age 60) can expect to live based on current rates of ill-health and mortality.</p> <p>The equivalent lost healthy year fractions required for the HALE calculation are estimated as the all-cause years lost due to disability (YLD) rate per capita, adjusted for independent comorbidity, by age, sex and country. | Original scale | Interval |
| Citation | WHO (n.d.) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.3. Basic Welfare |
| Aggregation | IRT to construct subattribute 2.3. Basic Welfare. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Social group equality in respect for civil liberties (v_24_01)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2clsocgrp |
| Name in data set | v_24_01 |
| Definition | <p>Question: Do all social groups, as distinguished by language, ethnicity, religion, race, region or caste, enjoy the same level of civil liberties? Or are some groups generally in a more favourable position?</p> <p>Responses:</p> <p>0. Members of some social groups enjoy far fewer civil liberties than the general population.</p> <p>1. Members of some social groups enjoy substantially fewer civil liberties than the general population.</p> <p>2. Members of some social groups enjoy moderately fewer civil liberties than the general population.</p> <p>3. Members of some social groups enjoy slightly fewer civil liberties than the general population.</p> <p>4. Members of all salient social groups enjoy the same level of civil liberties.</p> <p>Clarification: Here, civil liberties are understood as comprising access to justice, private property rights, freedom of movement and freedom from forced labour.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.4. Political Equality 2.4.A. Social Group Equality |
| Aggregation | IRT to construct subcomponent 2.4.A. Social Group Equality. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Power distributed by social group (v_24_02)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2pepwsoc |
| Name in data set | v_24_02 |
| Definition | <p>Question: Is political power distributed according to social groups?</p> <p>Responses:</p> <p>0. Political power is monopolized by one social group comprising a minority of the population. This monopoly is institutionalized, or not subject to frequent change.</p> <p>1. Political power is monopolized by several social groups comprising a <i>minority</i> of the population. This monopoly is institutionalized, or not subject to frequent change.</p> <p>2. Political power is monopolized by several social groups comprising a <i>majority</i> of the population. This monopoly is institutionalized, or not subject to frequent change.</p> <p>3. Either all social groups possess some political power, with some groups having more power than others; or different social groups alternate in power, with one group controlling much of the political power for a period of time followed by another group, but all significant groups have a turn at the seat of power.</p> <p>4. All social groups have roughly equal political power or there are no strong ethnic, caste, linguistic, racial, religious or regional differences to speak of. Social group characteristics are not relevant to politics.</p> <p>Clarification: A social group is differentiated within a country by caste, ethnicity, language, race, region, religion or some combination thereof. (It does not include identities grounded in sexual orientation or socio-economic status.) Social group identity is contextually defined and is likely to vary across countries and through time. Social group identities are also likely to cross-cut, so that a given person could be defined in multiple ways and as part of multiple groups. Nonetheless, at any given point in time there are social groups within a society that are understood by those residing in that society to be different, in ways that may be politically relevant.</p> |

| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Power distributed by sexual orientation (v_24_03)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2pepwrort |
| Name in data set | v_24_03 |
| Definition | <p>Question: To what extent is political power distributed according to sexual orientation?</p> <p>Responses:</p> <p>0. LGBTs are entirely excluded from the public sphere and thus deprived of any real political power (even though they may possess formal powers such as the ballot).</p> <p>1. LGBTs have much less political power than heterosexuals. LGBTs enjoy formal rights to participate in politics but are subject to informal norms that often serve to exclude them from the halls of power.</p> <p>2. LGBTs have somewhat less political power than heterosexual citizens.</p> <p>3. LGBTs have about the same political power as heterosexuals. Each group enjoys a degree of political power that is roughly proportional to their population.</p> <p>4. LGBTs enjoy somewhat more political power than heterosexuals by virtue of greater wealth, education, and high level of organization and mobilization</p> <p>Clarification: This question contrasts (A) the political power of heterosexuals and lesbian, gay, bisexual, and transgender (LGBT) members of the polity who are not open about their sexuality with (B) the political power of lesbian, gay, bisexual, and transgender (LGBT) members of the polity who are open about their sexuality. (A) will be referred to as 'heterosexual' and (B) as 'LGBT'.</p> <p>Note that in comparing the political power of these two groups we are comparing their power per person. So, when we say that LGBT have less, equal or more power than heterosexuals we mean relative to their share of the population (as near as this can be estimated).</p> |

| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Equal opportunity (v_24_08)

| | |
|-----------------------------------|--|
| Data source | BTI |
| Original variable | equal |
| Name in data set | v_24_08 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below:</p> <ol style="list-style-type: none"> 1. Equality of opportunity is not achieved. Women and/or members of ethnic, religious and other groups have only very limited access to education, public office and employment. There are no legal provisions against discrimination. 2. 3. 4. Equality of opportunity is only partially achieved. Women and/or members of ethnic, religious and other groups have limited access to education, public office and employment. There are some legal provisions against discrimination, but their implementation is highly deficient. 5. 6. 7. Equality of opportunity is largely achieved. Women and members of ethnic, religious and other groups have near-equal access to education, public office and employment. There are a number of legal provisions against discrimination, but their implementation is at times insufficient. 8. 9. 10. Equality of opportunity is achieved. Women and members of ethnic, religious and other groups have equal access to education, public office and employment. There is a comprehensive and effective legal and institutional framework for the protection against discrimination. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. |
| Indicator of | 2. Rights 2.4. Political Equality 2.4.A. Social Group Equality |
| Aggregation | IRT to construct subcomponent 2.4.A. Social Group Equality. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Social class equality in respect for civil liberties (v_24_09)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2clacjust |
| Name in data set | v_24_09 |
| Definition | <p>Question: Do poor people enjoy the same level of civil liberties as rich people do?</p> <p>Responses:</p> <p>0. Poor people enjoy far fewer civil liberties than rich people.</p> <p>1. Poor people enjoy substantially fewer civil liberties than rich people.</p> <p>2. Poor people enjoy moderately fewer civil liberties than rich people.</p> <p>3. Poor people enjoy slightly fewer civil liberties than rich people.</p> <p>4. Poor people enjoy the same level of civil liberties as rich people.</p> <p>Clarification: This question specifies the extent to which the level of civil liberties is generally the same across socio-economic groups so that people with a low social status are not treated worse than people with high social status. Here, civil liberties are understood to include access to justice, private property rights, freedom of movement and freedom from forced labour.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.4. Political Equality 2.4.B. Economic Equality |
| Aggregation | IRT to construct subcomponent 2.4.B. Economic Equality. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Power distributed by socio-economic position (v_24_10)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2pepwrses |
| Name in data set | v_24_10 |
| Definition | <p>Question: Is political power distributed according to socio-economic position?</p> <p>Responses:</p> <p>0. Wealthy people enjoy a virtual monopoly on political power. People of average wealth and poorer people have almost no influence.</p> <p>1. Wealthy people enjoy a dominant hold on political power. People of average wealth have little say. Poorer people have essentially no influence.</p> <p>2. Wealthy people have a very strong hold on political power. People of average wealth or poorer people have some degree of influence but only on issues that matter less to wealthy people.</p> <p>3. Wealthy people have more political power than others but people of average wealth have almost as much influence and poor people have a significant degree of political power.</p> <p>4. Wealthy people have no more political power than those whose economic status is average or poor. Political power is more or less equally distributed across economic groups.</p> <p>Clarification: All societies are characterized by some degree of economic (wealth and income) inequality. In some societies, income and wealth are distributed in a grossly unequal fashion. In others, the difference between rich and poor is not so great. Here, we are concerned not with the degree of social inequality but rather with the political effects of this inequality. Specifically, we are concerned with the extent to which wealth and income translate into political power.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.4. Political Equality 2.4.B. Economic Equality |
| Aggregation | IRT to construct subcomponent 2.4.B. Economic Equality. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Exclusion by socio-economic group (v_24_11)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2xpe_exlecon |
| Name in data set | v_24_11 |
| Definition | <p>Index of (political) exclusion by socio-economic group.</p> <p>Clarification:</p> <p>Exclusion is when individuals are denied access to services or participation in governed spaces (spaces that are part of the public space and the government should regulate, while excluding private spaces and organizations except when exclusion in those private spheres is linked to exclusion in the public sphere) based on their identity or belonging to a particular group. The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators power distributed by socio-economic group (v2pepwrses), socio-economic position equality in respect for civil liberties (v2clacjust), access to public services by socio-economic group (v2peapsecon), access to state jobs by socio-economic group (v2peasjsoecon), and access to state business opportunities by socio-economic group (v2peasbecon). Exclusion is when individuals are denied access to services or participation in governed spaces (spaces that are part of the public space and the government should regulate, while excluding private spaces and organizations except when exclusion in those private spheres is linked to exclusion in the public sphere) based on their identity or belonging to a particular group.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Inverted and recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). Values for 2024 were carried forward from 2023, as V-Dem did not provide data for this indicator in 2024. |

Female vs. male mean years of schooling (v_24_17)

| | |
|--|--|
| Data source | IHME |
| Original name | Years of Schooling |
| Name in data set | v_24_17 |
| Definition | Average years of educational attainment for adults between 25 and 29 years of age; male and female. Age-standardized aggregates use model populations to control for differences in age structure across time and geography. The population-weighted aggregates use IHME population estimates to create average values for the groups in question. |
| Original scale | Interval |
| Citation | IHME (2020) |
| Data manipulation for aggregation | Created a ratio of gender bias in education by dividing the mean for females by the mean for males. Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.4. Political Equality 2.4.C. Gender Equality |
| Aggregation | IRT to construct subcomponent 2.4.C. Gender Equality. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Lower chamber female legislators (v_24_18)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2lgfemleg |
| Name in data set | v_24_18 |
| Definition | Question: What percentage of the lower (or unicameral) chamber of the legislature is female? Responses: Percentage. |
| Original scale | Interval |
| Citation | Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.4. Political Equality 2.4.C. Gender Equality |
| Aggregation | IRT to construct subcomponent 2.4.C. Gender Equality. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Exclusion by gender (v_24_19)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2xpe_exlgender |
| Name in data set | v_24_19 |
| Definition | <p>Index of (political) exclusion by gender.</p> <p>Clarification:</p> <p>Exclusion is when individuals are denied access to services or participation in governed spaces (spaces that are part of the public space and the government should regulate, while excluding private spaces and organizations except when exclusion in those private spheres is linked to exclusion in the public sphere) based on their identity or belonging to a particular group.</p> <p>The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators power distributed by gender (v2pepwgen), equality in respect for civil liberties by gender (v2clgencl), access to public services by gender (v2peapsgen), access to state jobs by gender (v2peasjgen), and access to state business opportunities by gender (v2peasbgen).</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Inverted and recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). Values for 2024 were carried forward from 2023, as V-Dem did not provide data for this indicator in 2024. |
| Indicator of | 2. Rights 2.4. Political Equality 2.4.C. Gender Equality |
| Aggregation | IRT to construct subcomponent 2.4.C. Gender Equality. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Political empowerment (v_24_22)

| | |
|-----------------------------------|---|
| Data source | GGGR |
| Original variable | ggr_empower |
| Name in data set | v_24_22 |
| Definition | This is an estimated index, which considers the gaps between men and women in terms of (1) women in parliament, (2) women in ministerial positions, and (3) years with female/male head of state (last 50). |
| Original scale | Interval |
| Citation | World Economic Forum (2024) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.4. Political Equality 2.4.C. Gender Equality |
| Aggregation | IRT to construct subcomponent 2.4.C. Gender Equality. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Labour force participation rate (women-men) (v_24_23)

| | |
|--|---|
| Data source | ILOSTAT |
| Original variable | EAP_DWAP_SEX_AGE_RT |
| Name in data set | v_24_23 |
| Definition | <p>The labour force participation rate is the number of persons in the labour force as a percentage of the working-age population. The labour force is the sum of the number of persons employed and the number of persons unemployed. Thus, the measurement of the labour force participation rate requires the measurement of both employment and unemployment. Employment comprises all persons of working age who during a specified brief period, such as one week or one day, were in the following categories: (a) paid employment (whether at work or with a job but not at work); or (b) self-employment (whether at work or with an enterprise but not at work). The unemployed comprise all persons of working age who were: (a) without work during the reference period, i.e. were not in paid employment or self-employment; (b) currently available for work, i.e. were available for paid employment or self-employment during the reference period; and (c) seeking work, i.e. had taken specific steps in a specified recent period to seek paid employment or self-employment.</p> <p>The data are published with disaggregation by age (bands) and gender. The age band selected for this purpose is 'Total'.</p> |
| Original scale | Interval |
| Citation | ILO (n.d.) |
| Data manipulation for aggregation | Missing values have been imputed through Stineman interpolation within countries using the information from the years with valid values. Subtracted values for men from those for women, reporting the difference. Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.4. Political Equality 2.4.C. Gender Equality |
| Aggregation | IRT to construct subcomponent 2.4.C. Gender Equality. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Proportion of women in managerial positions (v_24_24)

| | |
|-----------------------------------|---|
| Data source | ILOSTAT |
| Original variable | SDG_T552_NOC_RT |
| Name in data set | v_24_24 |
| Definition | This indicator refers to the proportion of females in the total number of persons employed in managerial positions. It is recommended to use two different measures jointly for this indicator: the share of females in (total) management and the share of females in senior and middle management (thus excluding junior management). The joint calculation of these two measures provides information on whether women are more represented in junior management than in senior and middle management, thus pointing to an eventual ceiling for women to access higher-level management positions. In these cases, calculating only the share of women in (total) management would be misleading, in that it would suggest that women hold positions with more decision-making power and responsibilities than they actually do. |
| Original scale | Interval |
| Citation | ILO (n.d.) |
| Data manipulation for aggregation | Missing values have been imputed through Stineman interpolation within countries using the information from the years with valid values. Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.4. Political Equality 2.4.C. Gender Equality |
| Aggregation | IRT to construct subcomponent 2.4.C. Gender Equality. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Account ownership at a financial institution or with a mobile-money-service provider (v_24_25)

| | |
|-----------------------------------|--|
| Data source | World Bank |
| Original variable | FX.OWN.TOTL.FE.ZS |
| Name in data set | v_24_25 |
| Definition | Account denotes the percentage of respondents who report having an account (by themselves or together with someone else) at a bank or another type of financial institution or report personally using a mobile money service in the past 12 months (% age 15+). Data are provided disaggregated by gender. |
| Original scale | Interval |
| Citation | World Bank (n.d.) |
| Data manipulation for aggregation | Missing values have been imputed through Stineman interpolation within countries using the information from the years with valid values. Values for men were subtracted from those for women and the difference is used at the indicator value. Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 2. Rights 2.4. Political Equality 2.4.C. Gender Equality |
| Aggregation | IRT to construct subcomponent 2.4.C. Gender Equality. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Chapter 3

RULE OF LAW

Rule of Law is the third of the four attributes of democracy developed by International IDEA's Global State of Democracy Indices. This section of the Codebook provides details about the subattributes and indicators that comprise the index of Rule of Law.

1 attribute

- Rule of Law

4 subattributes

- Judicial Independence
- Absence of Corruption
- Predictable Enforcement
- Personal Integrity and Security

30 indicators

ATTRIBUTE

Rule of Law (rule_law_est)

| | |
|-----------------------------------|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | rule_law_est |
| Definition | Beyond regular elections, the exercise of political power needs to be subject to defined limits and continuous scrutiny and people should be able to live a secure life without the risk of political violence. If there is not integrity in the public administration and judiciary is not independent, executive power is more prone to be abused for private gain and to bias in political decision making and implementation. The four subattributes were aggregated into the Rule of Law index using BFA. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | — |
| Aggregation | — |
| Indicators included | jud_ind_est, abs_corrupt_est, predict_enf_est, pers_integ_sec_est |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | rule_law_l = lower bound for the 68% confidence interval rule_law_u = upper bound for the 68% confidence interval |

SUBATTRIBUTES

Judicial Independence (jud_ind_est)

| | |
|-----------------------------------|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | jud_ind_est |
| Definition | The Judicial Independence subattribute denotes the extent to which the courts are not subject to undue influence from the other branches of government, especially the executive. Since our framework places judicial independence under the attribute concerning the Rule of Law, it is important to supplement the four Judicial Independence indicators with two indicators on government compliance with the courts. The seven indicators were aggregated into the Judicial Independence subattribute using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 3. Rule of Law |
| Aggregation | BFA of 3.1. Judicial Independence, 3.2. Absence of Corruption, 3.3. Predictable Enforcement, and 3.4. Personal Integrity and Security to create 3. Rule of Law. |
| Indicators included | v_31_01, v_31_02, v_31_03, v_31_04, v_31_06, v_31_07, v_31_08 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | jud_ind_l = lower bound for the 68% confidence interval jud_ind_u = upper bound for the 68% confidence interval |

Absence of Corruption (abs_corrupt_est)

| | |
|--|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | abs_corrupt_est |
| Definition | The Absence of Corruption subattribute denotes the extent to which the executive and the public administration, more broadly, do not abuse their office for personal gain. Four V-Dem indicators explicitly refer to corruption in the government broadly understood, i.e. the executive and public administration more generally (but excluding courts and parliaments). These are used along with another expert-coded but broader indicator of government corruption from ICRG, and in-house coded measures from BTI and Freedom House. The seven indicators have been aggregated into the Absence of Corruption subattribute using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 3. Rule of Law |
| Aggregation | BFA of 3.1. Judicial Independence, 3.2. Absence of Corruption, 3.3. Predictable Enforcement, and 3.4. Personal Integrity and Security to create 3. Rule of Law. |
| Indicators included | v_32_01, v_32_02, v_32_03, v_32_04, v_32_05, v_32_06, v_32_07 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | abs_corrupt_l = lower bound for the 68% confidence interval abs_corrupt_u = upper bound for the 68% confidence interval |

Predictable Enforcement (predict_enf_est)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | predict_enf_est |
| Definition | The Predictable Enforcement subattribute denotes the extent to which the executive and public officials enforce laws in a predictable manner. To measure the related feature of Predictable Enforcement, five expert-coded V-Dem indicators on the executive's respect for constitutional provisions, the presence of transparent laws with predictable enforcement, and rule-abiding in the public sector, and the practices of appointment in the state administration and armed forces are used. These are complemented by an indicator from ICRG that assesses the strength and expertise of the bureaucracy and an indicator from Freedom House that measures the openness and transparency in government. To round out the measurement of the extent to which the government enforces laws in consistent ways, we added a measure of law and order from ICRG, and measures of administrative capacity and the monopoly on the use of force from BTI. The 10 indicators were aggregated into the Predictable Enforcement subattribute using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 3. Rule of Law |
| Aggregation | BFA of 3.1. Judicial Independence, 3.2. Absence of Corruption, 3.3. Predictable Enforcement, and 3.4. Personal Integrity and Security to create 3. Rule of Law. |
| Indicators included | v_33_01, v_33_02, v_33_03, v_33_04, v_33_05, v_33_06, v_33_07, v_33_08, v_33_09, v_33_10 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | predict_enf_l = lower bound for the 68% confidence interval predict_enf_u = upper bound for the 68% confidence interval |

Personal Integrity and Security (pers_integ_sec_est)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | pers_integ_sec_est |
| Definition | Personal Integrity and Security denotes the extent to which bodily integrity is respected and people are free from state and non-state political violence. To operationalize personal integrity and security, three indicators were used to capture different types of violations, such as torture and political and extrajudicial disappearances and killings. These indicators come from V-Dem and PTS. The six indicators were aggregated into the Predictable Enforcement subattribute using IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 3. Rule of Law |
| Aggregation | BFA of 3.1. Judicial Independence, 3.2. Absence of Corruption, 3.3. Predictable Enforcement, and 3.4. Personal Integrity and Security to create 3. Rule of Law. |
| Indicators included | v_34_01, v_34_02, v_34_03, v_34_04, v_34_06, v_34_07 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | pers_integ_sec_l = lower bound for the 68% confidence interval pers_integ_sec_u = upper bound for the 68% confidence interval |

INDICATORS

High Court independence (v_31_01)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2juhcind |
| Name in data set | v_31_01 |
| Definition | <p>Question: When the High Court in the judicial system rules in cases that are salient to the government, how often would you say that it makes decisions that merely reflect the government's wishes regardless of its sincere view of the legal record?</p> <p>Responses:</p> <ol style="list-style-type: none"> 0. Always. 1. Usually. 2. About half of the time. 3. Seldom. 4. Never. <p>Clarification: We are seeking to identify autonomous judicial decision making and its absence. Decisions certainly can reflect government wishes without 'merely reflecting' those wishes, in that a court can be autonomous when its decisions support the government's position because a court can be fairly persuaded that the government's position is meritorious. 'Merely reflect the wishes of the government' means that the court's own sincere evaluation of the record is irrelevant to the outcome. The court simply adopts the government's position regardless of its sincere view.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.1. Judicial Independence |
| Aggregation | IRT to construct subattribute 3.1. Judicial Independence. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Lower court independence (v_31_02)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2juncind |
| Name in data set | v_31_02 |
| Definition | <p>Question: When judges not on the High Court are ruling in cases that are salient to the government, how often would you say that their decisions merely reflect government wishes regardless of their sincere view of the legal record?</p> <p>Responses:</p> <ul style="list-style-type: none"> 0. Always. 1. Usually. 2. About half of the time. 3. Seldom. 4. Never. |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | <p>3. Rule of Law</p> <p>3.1. Judicial Independence</p> |
| Aggregation | IRT to construct subattribute 3.1. Judicial Independence. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Compliance with High Court (v_31_03)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2juhccomp |
| Name in data set | v_31_03 |
| Definition | <p>Question: How often would you say the government complies with important decisions of the High Court with which it disagrees?</p> <p>Responses:</p> <p>0. Never.</p> <p>1. Seldom.</p> <p>2. About half of the time.</p> <p>3. Usually.</p> <p>4. Always.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | <p>3. Rule of Law</p> <p>3.1. Judicial Independence</p> |
| Aggregation | IRT to construct subattribute 3.1. Judicial Independence. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Compliance with judiciary (v_31_04)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2jucomp |
| Name in data set | v_31_04 |
| Definition | <p>Question: How often would you say the government complies with important decisions by other courts with which it disagrees?</p> <p>Responses:</p> <ol style="list-style-type: none"> 0. Never. 1. Seldom. 2. About half of the time. 3. Usually. 4. Always. <p>Clarification: We are looking for a judgment on the entire judiciary excluding the High Court. Consider judges in both the ordinary courts and the specialized courts.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | <p>3. Rule of Law</p> <p>3.1. Judicial Independence</p> |
| Aggregation | IRT to construct subattribute 3.1. Judicial Independence. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

F1 Rule of law (v_31_06)

| | |
|--|---|
| Data source | FITW |
| Original variable | F1 |
| Name in data set | v_31_06 |
| Definition | Question: Is there an independent judiciary? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 3. Rule of Law 3.1. Judicial Independence |
| Aggregation | IRT to construct subattribute 3.1. Judicial Independence. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Separation of power (v_31_07)

| | |
|-----------------------------------|---|
| Data source | BTI |
| Original variable | separation |
| Name in data set | v_31_07 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below:</p> <ol style="list-style-type: none"> 1. There is no separation of powers, neither de jure nor de facto. 2. 3. 4. The separation of powers is formally established but weak in practice. One branch, generally the executive, has largely undermined checks and balances. 5. 6. 7. The separation of powers is in place and functioning. Checks and balances are occasionally subject to interference, but a restoration of balance is sought. 8. 9. 10. There is a clear separation of powers with mutual checks and balances. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. |
| Indicator of | 3. Rule of Law 3.1. Judicial Independence |
| Aggregation | IRT to construct subattribute 3.1. Judicial Independence. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Independent judiciary (v_31_08)

| | |
|-----------------------------------|---|
| Data source | BTI |
| Original variable | judiciary |
| Name in data set | v_31_08 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below:</p> <ol style="list-style-type: none"> 1. The judiciary is not independent and not institutionally differentiated. 2. 3. 4. The independence of the judiciary is heavily impaired by political authorities and high levels of corruption. It is to some extent institutionally differentiated, but severely restricted by functional deficits, insufficient territorial operability and scarce resources. 5. 6. 7. The judiciary is largely independent, even though occasionally its decisions are subordinated to political authorities or influenced by corruption. It is institutionally differentiated, but partially restricted by insufficient territorial or functional operability. 8. 9. 10. The judiciary is independent and free both from unconstitutional intervention by other institutions and from corruption. It is institutionally differentiated, and there are mechanisms for judicial review of legislative or executive acts. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. |
| Indicator of | 3. Rule of Law 3.1. Judicial Independence |
| Aggregation | IRT to construct subattribute 3.1. Judicial Independence. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Public sector corrupt exchanges (v_32_01)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2excrptps |
| Name in data set | v_32_01 |
| Definition | <p>Question: How routinely do public sector employees grant favours in exchange for bribes or other material inducements?</p> <p>Responses:</p> <p>0. Extremely common. Most public sector employees are systematically involved in petty but corrupt exchanges almost all the time.</p> <p>1. Common. Such petty but corrupt exchanges occur regularly involving a majority of public employees.</p> <p>2. Sometimes. About half or less than half of public sector employees engage in such exchanges for petty gains at times.</p> <p>3. Scattered. A small minority of public sector employees engage in petty corruption from time to time.</p> <p>4. No. Never, or hardly ever.</p> <p>Clarification: When responding to this question, think about a typical person employed in the public sector, excluding the military. If there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working in public service delivery, try to average them out before stating your response.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.2. Absence of Corruption |
| Aggregation | IRT to construct subattribute 3.2. Absence of Corruption. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Public sector theft (v_32_02)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2exthtfts |
| Name in data set | v_32_02 |
| Definition | <p>Question: How often do public sector employees steal, embezzle or misappropriate public funds or other state resources for personal or family use?</p> <p>Responses:</p> <p>0. Constantly. Public sector employees act as though all public resources were their personal or family property.</p> <p>1. Often. Public sector employees are responsible stewards of selected public resources but treat the rest as personal property.</p> <p>2. About half the time. Public sector employees are about as likely to be responsible stewards of selected public resources as they are to treat them as personal property.</p> <p>3. Occasionally. Public sector employees are responsible stewards of most public resources but treat selected others as personal property.</p> <p>4. Never, or hardly ever. Public sector employees are almost always responsible stewards of public resources and keep them separate from personal or family property.</p> <p>Clarification: When responding to this question, think about a typical person employed by the public sector, excluding the military. If there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working in public service delivery, try to average them out before stating your response.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.2. Absence of Corruption |
| Aggregation | IRT to construct subattribute 3.2. Absence of Corruption. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Executive embezzlement and theft (v_32_03)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2exembez |
| Name in data set | v_32_03 |
| Definition | <p>Question: How often do members of the executive (the head of state, the head of government and cabinet ministers), or their agents, steal, embezzle or misappropriate public funds or other state resources for personal or family use?</p> <p>Responses:</p> <p>0. Constantly. Members of the executive act as though all public resources were their personal or family property.</p> <p>1. Often. Members of the executive are responsible stewards of selected public resources but treat the rest as personal property.</p> <p>2. About half the time. Members of the executive are about as likely to be responsible stewards of selected public resources as they are to treat them as personal property.</p> <p>3. Occasionally. Members of the executive are responsible stewards of most public resources but treat selected others as personal property.</p> <p>4. Never, or hardly ever. Members of the executive are almost always responsible stewards of public resources and keep them separate from personal or family property.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.2. Absence of Corruption |
| Aggregation | IRT to construct subattribute 3.2. Absence of Corruption. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Executive bribery and corrupt exchanges (v_32_04)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2exbribe |
| Name in data set | v_32_04 |
| Definition | <p>Question: How routinely do members of the executive (the head of state, the head of government and cabinet ministers) or their agents grant favours in exchange for bribes or other material inducements?</p> <p>Responses:</p> <ol style="list-style-type: none"> 0. It is routine and expected. 1. It happens more often than not in dealings with the executive. 2. It happens but is unpredictable; those dealing with the executive find it hard to predict when an inducement will be required. 3. It happens occasionally but is not expected. 4. It never, or hardly ever, happens. |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | <p>3. Rule of Law</p> <p>3.2. Absence of Corruption</p> |
| Aggregation | IRT to construct subattribute 3.2. Absence of Corruption. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Corruption (v_32_05)

| | |
|--|---|
| Data source | ICRG |
| Original variable | Corruption (F) |
| Name in data set | v_32_05 |
| Definition | This is an assessment of corruption within the political system. The most common form of corruption met directly by business is financial corruption in the form of demands for special payments and bribes connected with import and export licences, exchange controls, tax assessments, police protection or loans. Although this measure takes such corruption into account, it is more concerned with actual or potential corruption in the form of excessive patronage, nepotism, job reservations, 'favour-for-favours', secret party funding and suspiciously close ties between politics and business. |
| Original scale | Interval |
| Citation | Howell (2011) |
| Data manipulation for aggregation | — |
| Indicator of | 3. Rule of Law 3.2. Absence of Corruption |
| Aggregation | IRT to construct subattribute 3.2. Absence of Corruption. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

C2 Functioning of government (v_32_06)

| | |
|-----------------------------------|---|
| Data source | FITW |
| Original variable | C2 |
| Name in data set | v_32_06 |
| Definition | Question: Are safeguards against official corruption strong and effective? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 3. Rule of Law 3.2. Absence of Corruption |
| Aggregation | IRT to construct subattribute 3.2. Absence of Corruption. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Prosecution of office abuse (v_32_07)

| | |
|--|--|
| Data source | BTI |
| Original variable | prosecution |
| Name in data set | v_32_07 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below:</p> <ol style="list-style-type: none"> 1. Officeholders who break the law and engage in corruption can do so without fear of legal consequences or adverse publicity. 2. 3. 4. Officeholders who break the law and engage in corruption are not adequately prosecuted, but occasionally attract adverse publicity. 5. 6. 7. Officeholders who break the law and engage in corruption generally are prosecuted under established laws and often attract adverse publicity, but occasionally slip through political, legal or procedural loopholes. 8. 9. 10. Officeholders who break the law and engage in corruption are prosecuted rigorously under established laws and always attract adverse publicity. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. |
| Indicator of | 3. Rule of Law 3.2. Absence of Corruption |
| Aggregation | IRT to construct subattribute 3.2. Absence of Corruption. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Executive respects constitution (v_33_01)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2exrescon |
| Name in data set | v_33_01 |
| Definition | <p>Question: Do members of the executive (the head of state, the head of government and cabinet ministers) respect the constitution?</p> <p>Responses:</p> <p>0. Members of the executive violate the constitution whenever they want to without legal consequences.</p> <p>1. Members of the executive violate most provisions of the constitution without legal consequences, but must respect certain provisions.</p> <p>2. Somewhere between 1 and 3. Members of the executive would face legal consequences for violating most provisions of the constitution but can disregard some provisions without any legal consequences.</p> <p>3. Members of the executive rarely violate the constitution and when it happens they face legal charges.</p> <p>4. Members of the executive never violate the constitution.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.3. Predictable Enforcement |
| Aggregation | IRT to construct subattribute 3.3. Predictable Enforcement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Transparent laws with predictable enforcement (v_33_02)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2cltrnslw |
| Name in data set | v_33_02 |
| Definition | <p>Question: Are the laws of the land clear, well publicized, coherent (consistent with each other), relatively stable from year to year and enforced in a predictable manner?</p> <p>Responses:</p> <p>0. Transparency and predictability are almost non-existent. The laws of the land are created and/or enforced in completely arbitrary fashion.</p> <p>1. Transparency and predictability are severely limited. The laws of the land are more often than not created and/or enforced in arbitrary fashion.</p> <p>2. Transparency and predictability are somewhat limited. The laws of the land are mostly created in a non-arbitrary fashion but enforcement is rather arbitrary in some parts of the country.</p> <p>3. Transparency and predictability are fairly strong. The laws of the land are usually created and enforced in a non-arbitrary fashion.</p> <p>4. Transparency and predictability are very strong. The laws of the land are created and enforced in a non-arbitrary fashion.</p> <p>Clarification: This question focuses on the transparency and predictability of the laws of the land.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.3. Predictable Enforcement |
| Aggregation | IRT to construct subattribute 3.3. Predictable Enforcement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Rigorous and impartial public administration (v_33_03)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2clrspct |
| Name in data set | v_33_03 |
| Definition | <p>Question: Are public officials rigorous and impartial in the performance of their duties?</p> <p>Responses:</p> <p>0. The law is not respected by public officials. Arbitrary or biased administration of the law is rampant.</p> <p>1. The law is weakly respected by public officials. Arbitrary or biased administration of the law is widespread.</p> <p>2. The law is modestly respected by public officials. Arbitrary or biased administration of the law is moderate.</p> <p>3. The law is mostly respected by public officials. Arbitrary or biased administration of the law is limited.</p> <p>4. The law is generally fully respected by the public officials. Arbitrary or biased administration of the law is rare.</p> <p>Clarification: This question focuses on the extent to which public officials generally abide by the law and treat like cases alike; or, conversely, the extent to which public administration is characterized by arbitrariness and bias (i.e. nepotism, cronyism or discrimination). The question covers the public officials who handle the cases of ordinary people. If no functioning public administration exists, the lowest score (0) applies.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.3. Predictable Enforcement |
| Aggregation | IRT to construct subattribute 3.3. Predictable Enforcement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Criteria for appointment decisions in the state administration (v_33_04)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2stcritrecadm |
| Name in data set | v_33_04 |
| Definition | <p>Question: To what extent are appointment decisions in the state administration based on personal and political connections, as opposed to skills and merit?</p> <p>Responses:</p> <p>0. All appointment decisions in the state administration are based on personal or political connections. None are based on skills and merit.</p> <p>1. Most appointment decisions in the state administration are based on personal or political connections. Only a few are based on skills and merit.</p> <p>2. Approximately half of the appointment decisions in the state administration are based on personal or political connections. Approximately half are based on skills and merit.</p> <p>3. Only few of the appointment decisions in the state administration are based on personal or political connections. Most appointment decisions are based on skills and merit.</p> <p>4. None of the appointment decisions in the state administration are based on personal or political connections. All are based on skills and merit.</p> <p>Clarification:</p> <p>Appointment decisions include hiring, firing and promotion in the state administration. Note that the question refers to the typical de facto (rather than de jure) situation obtaining in the state administration, excluding the armed forces. If there are large differences between different branches of the state administration or between top and lower level state administrators please try to consider the average when answering the question.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |

| Aggregation | IRT to construct subattribute 3.3. Predictable Enforcement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Criteria for appointment decisions in the armed forces (v_33_05)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2stcritapparm |
| Name in data set | v_33_05 |
| Definition | <p>Question: To what extent are appointment decisions in the armed forces based on personal or political connections or alternatively based on skills and merit?</p> <p>Responses:</p> <p>0. All appointment decisions in the armed forces are based on personal or political connections. None are based on skills and merit.</p> <p>1. Most appointment decisions in the armed forces are based on personal or political connections. Only a few are based on skills and merit.</p> <p>2. Approximately half of the appointment decisions in the armed forces are based on personal or political connections. Approximately half are based on skills and merit.</p> <p>3. Only few of the appointment decisions in the armed forces are based on personal or political connections. Most are based on skills and merit.</p> <p>4. None of the appointment decisions in the armed forces are based on personal or political connections. All are based on skills and merit.</p> <p>Clarification:</p> <p>Appointment decisions include hiring, firing and promotions in the armed forces. Note that the question refers to the typical de facto (rather than de jure) situation obtaining in the armed forces. If there are large differences between different branches of the armed forces or between top and lower level ranks please try to consider the average when answering the question.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.3. Predictable Enforcement |
| Aggregation | IRT to construct subattribute 3.3. Predictable Enforcement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Bureaucratic quality (v_33_06)

| | |
|--|---|
| Data source | ICRG |
| Original variable | Bureaucratic quality (L) |
| Name in data set | v_33_06 |
| Definition | The institutional strength and quality of the bureaucracy is another shock absorber that tends to minimize revisions of policy when governments change. Therefore, high points are given to countries where the bureaucracy has the strength and expertise to govern without drastic changes in policy or interruptions in government services. In these low-risk countries, the bureaucracy tends to be somewhat autonomous from political pressure and to have an established mechanism for recruitment and training. Countries that lack the cushioning effect of a strong bureaucracy receive low points because a change in government tends to be traumatic in terms of policy formulation and day-to-day administrative functions. |
| Original scale | Ordinal |
| Citation | Howell (2011) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.3. Predictable Enforcement |
| Aggregation | IRT to construct subattribute 3.3. Predictable Enforcement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Law and order (v_33_07)

| | |
|--|--|
| Data source | ICRG |
| Original variable | Law and order (I) |
| Name in data set | v_33_07 |
| Definition | To what extent is the legal system strong and impartial and to what degree is there popular observance of the law? |
| Original scale | Ordinal |
| Citation | Howell (2011) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.3. Predictable Enforcement |
| Aggregation | IRT to construct subattribute 3.3. Predictable Enforcement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

C3 Functioning of government (v_33_08)

| | |
|--|--|
| Data source | FITW |
| Original variable | C3 |
| Name in data set | v_33_08 |
| Definition | Question: Does the government operate with openness and transparency? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 3. Rule of Law 3.3. Predictable Enforcement |
| Aggregation | IRT to construct subattribute 3.3. Predictable Enforcement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Monopoly on the use of force (v_33_09)

| | |
|-----------------------------------|---|
| Data source | BTI |
| Original variable | monopoly |
| Name in data set | v_33_09 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below:</p> <ol style="list-style-type: none"> 1. There is no state monopoly on the use of force. 2. 3. 4. The state's monopoly on the use of force is established only in key parts of the country. Large areas of the country are controlled by guerrillas, paramilitaries or clans. 5. 6. 7. The state's monopoly on the use of force is established nationwide in principle, but it is challenged by guerrillas, mafias or clans in territorial enclaves. 8. 9. 10. There is no competition with the state's monopoly on the use of force throughout the entire territory. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. |
| Indicator of | 3. Rule of Law 3.3. Predictable Enforcement |
| Aggregation | IRT to construct subattribute 3.3. Predictable Enforcement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Basic administration (v_33_10)

| | |
|--|--|
| Data source | BTI |
| Original variable | admin |
| Name in data set | v_33_10 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below:</p> <ol style="list-style-type: none"> 1. The administrative structures of the state are limited to keeping the peace and maintaining law and order. Their territorial scope is very limited, and broad segments of the population are not covered. 2. 3. 4. The administrative structures of the state are extending beyond maintaining law and order, but their territorial scope and effectivity are limited. 5. 6. 7. The administrative structures of the state provide most basic public services throughout the country, but their operation is to some extent deficient (lack of resources, corruption, inefficiency). 8. 9. 10. The state has a differentiated administrative structure throughout the country which provides all basic public services. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. |
| Indicator of | 3. Rule of Law 3.3. Predictable Enforcement |
| Aggregation | IRT to construct subattribute 3.3. Predictable Enforcement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Freedom from torture (v_34_01)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2cltort |
| Name in data set | v_34_01 |
| Definition | <p>Question: Is there freedom from torture?</p> <p>Responses:</p> <p>0. Not respected by the public authorities. Torture is practised systematically and is incited and approved by the leaders of the government.</p> <p>1. Weakly respected by the public authorities. Torture is practised frequently but is often not incited or approved by senior leaders in the government. At the same time, government leaders are not actively working to prevent it.</p> <p>2. Somewhat. Torture is practised occasionally but is typically not approved by senior leaders in the government.</p> <p>3. Mostly respected by the public authorities. Torture is practised in a few isolated cases but is not incited or approved by senior government leaders.</p> <p>4. Fully respected by the public authorities. Torture is non-existent.</p> <p>Clarification: Torture refers to the deliberate inflicting of extreme pain, whether mental or physical, with the aim of extracting information or intimidating victims, who are in a state of incarceration. Here, we are concerned with torture practised by state officials or other agents of the state (the police, security forces, prison guards and paramilitary groups).</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.4. Personal Integrity and Security |
| Aggregation | IRT to construct subattribute 3.4. Personal Integrity and Security. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Freedom from political killings (v_34_02)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2clkill |
| Name in data set | v_34_02 |
| Definition | <p>Question: Is there freedom from political killings?</p> <p>Responses:</p> <p>0. Not respected by the public authorities. Political killings are practised systematically and they are typically incited and approved by the senior leaders of the government.</p> <p>1. Weakly respected by the public authorities. Political killings are practised frequently and senior government leaders are not actively working to prevent them.</p> <p>2. Somewhat respected by the public authorities. Political killings are practised occasionally but they are typically not incited and approved by senior government leaders.</p> <p>3. Mostly respected by the public authorities. Political killings are practised in a few isolated cases but they are not incited or approved by senior government leaders.</p> <p>4. Fully respected by the public authorities. Political killings do not take place.</p> <p>Clarification: Political killings are killings by the state or its agents without due process of law for the purpose of eliminating political opponents. These killings are the result of the deliberate use of lethal force by the police, security forces, prison officials or other agents of the state, including paramilitary groups.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.4. Personal Integrity and Security |
| Aggregation | IRT to construct subattribute 3.4. Personal Integrity and Security. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Political terror scale (v_34_03)

| | |
|--|---|
| Data source | Political Terror Scale |
| Original variable | PTS_S |
| Name in data set | v_34_03 |
| Definition | What is the level of political violence and terror? PTS scores based on information contained in the annual human rights reports produced by the US State Department. Reports are scored on a 5-point scale. Higher scores indicate higher levels of abuse, political terror or physical integrity rights violations than lower scores. |
| Original scale | Ordinal |
| Citation | Gibney et al. (2024) |
| Data manipulation for aggregation | Inverted so that higher scores represent better performance. Values for 2024 were coded by International IDEA following the original code book by Gibney et al. (2024). |
| Indicator of | 3. Rule of Law 3.4. Personal Integrity and Security |
| Aggregation | IRT to construct subattribute 3.4. Personal Integrity and Security. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Internal conflict (v_34_04)

| | |
|--|---|
| Data source | ICRG |
| Original variable | Internal conflict (D) |
| Name in data set | v_34_04 |
| Definition | An assessment of political violence in the country and its actual or potential impact on governance. The highest rating is given to those countries where there is no armed or civil opposition to the government and the government does not indulge in arbitrary violence, direct or indirect, against its own people. The lowest rating is given to a country embroiled in an ongoing civil war. The risk rating assigned is the sum of three subcomponents (Civil War/ Coup Threat, Terrorism/Political Violence, Civil Disorder), each with a maximum score of 4 points and a minimum score of 0 points. A score of 4 points equates to very low risk and a score of 0 points to very high risk. |
| Original scale | Ordinal |
| Citation | Howell (2011) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 3. Rule of Law 3.4. Personal Integrity and Security |
| Aggregation | IRT to construct subattribute 3.4. Personal Integrity and Security. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

G4 Personal autonomy and individual rights (v_34_06)

| | |
|-----------------------------------|---|
| Data source | FITW |
| Original variable | G4 |
| Name in data set | v_34_06 |
| Definition | Question: Do individuals enjoy equality of opportunity and freedom from economic exploitation? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 3. Rule of Law 3.4. Personal Integrity and Security |
| Aggregation | IRT to construct subattribute 3.4. Personal Integrity and Security. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

F3 Rule of law (v_34_07)

| | |
|--|---|
| Data source | FITW |
| Original variable | F3 |
| Name in data set | v_34_07 |
| Definition | Question: Is there protection from the illegitimate use of physical force and freedom from war and insurgencies? Country scores vary between 0 (worst) and 4 (best). |
| Original scale | Ordinal |
| Citation | Freedom House (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 3. Rule of Law 3.4. Personal Integrity and Security |
| Aggregation | IRT to construct subattribute 3.4. Personal Integrity and Security. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Chapter 4

PARTICIPATION

Participation represents the fourth of the four attributes of democracy developed by International IDEA's Global State of Democracy Indices.

This section of the Codebook offers details about the subattributes and indicators that comprise this attribute.

1 attribute

- **Participation**

3 subattributes

- Civil Society
- Civic Engagement
- Electoral Participation

13 indicators

ATTRIBUTE

Participation (participation_est)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | participation_est |
| Definition | Democratic institutions tend to be hollow if not filled by active citizens in connection with and between different kinds of elections. In other words, politically involved citizens are considered an important part of democracy. The more citizens are allowed to participate at all levels of government and make actual use of these opportunities, through participation in dynamic civil society organizations and elections, the more popular control and responsiveness can be achieved. The three subattributes were aggregated into the Participation index through an IRT model. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | — |
| Aggregation | — |
| Indicators included | civil_soc_est, civic_engage_est, elect_part_est |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | participation_l = lower bound for the 68% confidence interval participation_u = upper bound for the 68% confidence interval |

SUBATTRIBUTES

Civil Society (civil_soc_est)

| | |
|-----------------------------------|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | civil_soc_est |
| Definition | The measurement of Civil Society relies on six indicators. Three of these are V-Dem indicators based on expert surveys that consider the extent to which the legal and political context supports civil society organizations and activities. To these we have added measures of the strength of interest groups and social capital from BTI, and the infrastructurally focused E-Participation Index from the UN. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | — |
| Aggregation | — |
| Indicators included | v_41_01, v_41_02, v_41_03, v_41_04, v_41_05, v_41_06 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | civil_soc_l = lower bound for the 68% confidence interval civil_soc_u = upper bound for the 68% confidence interval |

Civic Engagement (civic_engage_est)

| | |
|--|--|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | civic_engage_est |
| Definition | The measure of Civic Engagement is constructed from four expert survey indicators of the extent to which people engage in political and non-political associations, and trade unions, as well as mobilization for democracy, all from V-Dem. We also include an indicator of civil society traditions from BTI. The indicators are aggregated into the Civic Engagement index through IRT. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | — |
| Aggregation | — |
| Indicators included | v_42_01, v_42_02, v_42_03, v_42_04, v_42_05 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | civic_engage_l = lower bound for the 68% confidence interval civic_engage_u = upper bound for the 68% confidence interval |

Electoral Participation (elect_part_est)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | elect_part_est |
| Definition | The level of electoral participation for the adult voting age population (VAP) in the last national election. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | The index is coded as having a value of zero in cases where the electoral regime has been interrupted, as indicated by the value of the V-Dem electoral regime indicator (v2x_elecreg). |
| Indicator of | — |
| Aggregation | — |
| Indicators included | v_43_01 |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |
| Auxiliary variables | — |

INDICATORS

CSO participatory environment (v_41_01)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2csprtcpt |
| Name in data set | v_41_01 |
| Definition | <p>Question: Which of these best describes the involvement of people in civil society organizations (CSOs)?</p> <p>Responses:</p> <p>0. Most associations are state-sponsored and although a large number of people may be active in them, their participation is not purely voluntary.</p> <p>1. Voluntary CSOs exist but few people are active in them.</p> <p>2. There are many diverse CSOs, but popular involvement is minimal.</p> <p>3. There are many diverse CSOs and it is considered normal for people to be at least occasionally active in at least one of them.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | <p>Pemstein et al. (2025)</p> <p>Coppedge et al. (2025)</p> |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | <p>4. Participation</p> <p>4.1. Civil Society</p> |
| Aggregation | IRT to construct subattribute 4.1. Civil Society. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Engaged society (v_41_02)

| | |
|--|---|
| Data source | V-Dem |
| Original variable | v2dlengage |
| Name in data set | v_41_02 |
| Definition | <p>Question: When important policy changes are being considered, how wide and how independent are public deliberations?</p> <p>Responses:</p> <ol style="list-style-type: none"> 0. Public deliberation is never, or almost never, allowed. 1. Some limited public deliberations are allowed but the public below the elite level is almost always either unaware of major policy debates or unable to take part in them. 2. Public deliberation is not repressed but infrequent; and non-elite actors are typically controlled and/or constrained by the elites. 3. Public deliberation is actively encouraged and some autonomous non-elite groups participate, but it is confined to a small slice of specialized groups that tend to be the same across issue areas. 4. Public deliberation is actively encouraged and a relatively broad segment of non-elite groups often participate; these vary with different issue areas. 5. Large numbers of non-elite groups as well as ordinary people tend to discuss major policies among themselves, in the media, in associations or neighbourhoods and in the streets. Grassroots deliberation is common and unconstrained. <p>Clarification: This question refers to deliberation as manifest in discussion, debate and other public forums such as popular media.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 4. Participation 4.1. Civil Society |
| Aggregation | IRT to construct subattribute 4.1. Civil Society. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

CSO consultation (v_41_03)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2cscnsult |
| Name in data set | v_41_03 |
| Definition | <p>Question: Are major civil society organizations (CSOs) routinely consulted by policymakers on policies relevant to their members?</p> <p>Responses:</p> <p>0. No. There is a high degree of insulation of the government from CSO input. The government may sometimes enlist or mobilize CSOs after policies are adopted to sell them to the public at large. But it does not often consult with them in formulating policies.</p> <p>1. To some degree. CSOs are but one set of voices that policymakers sometimes take into account.</p> <p>2. Yes. Important CSOs are recognized as stakeholders in important policy areas and given voice on such issues. This can be accomplished through formal corporatist arrangements or through less formal arrangements.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 4. Participation 4.1. Civil Society |
| Aggregation | IRT to construct subattribute 4.1. Civil Society. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

E-Participation index (v_41_04)

| | |
|-----------------------------------|---|
| Data source | UNEGS |
| Original variable | epart_idx |
| Name in data set | v_41_04 |
| Definition | The E-Participation index is a multifaceted framework, composed of three core components, i.e. e-information, e-consultation and e-decision-making. |
| Original scale | Interval |
| Citation | UN Department of Economic and Social Affairs (2024a) |
| Data manipulation for aggregation | — |
| Indicator of | 4. Participation 4.1. Civil Society |
| Aggregation | IRT to construct subattribute 4.1. Civil Society. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Interest groups (v_41_05)

| | |
|--|---|
| Data source | BTI |
| Original variable | int_group |
| Name in data set | v_41_05 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below:</p> <ol style="list-style-type: none"> 1. Interest groups are present only in isolated social segments, are on the whole poorly balanced and cooperate little. A large number of social interests remain unrepresented. 2. 3. 4. There is a narrow range of interest groups, in which important social interests are underrepresented. Only a few players dominate, and there is a risk of polarization. 5. 6. 7. There is an average range of interest groups, which reflect most social interests. However, a few strong interests dominate, producing a latent risk of pooling conflicts. 8. 9. 10. There is a broad range of interest groups that reflect competing social interests, tend to balance one another and are cooperative. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. |
| Indicator of | 4. Participation 4.1. Civil Society |
| Aggregation | IRT to construct subattribute 4.1. Civil Society. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Social capital (v_41_06)

| | |
|-----------------------------------|--|
| Data source | BTI |
| Original variable | soc_cap |
| Name in data set | v_41_06 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below:</p> <ol style="list-style-type: none"> 1. There is a very low level of trust among the population, and civic self-organization is rudimentary. 2. 3. 4. There is a fairly low level of trust among the population. The small number of autonomous, self-organized groups, associations and organizations is unevenly distributed or spontaneous and temporary. 5. 6. 7. There is a fairly high level of trust among the population and a substantial number of autonomous, self-organized groups, associations and organizations. 8. 9. 10. There is a very high level of trust among the population and a large number of autonomous, self-organized groups, associations and organizations. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. |
| Indicator of | 4. Participation 4.1. Civil Society |
| Aggregation | IRT to construct subattribute 4.1. Civil Society. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Engagement in independent non-political associations (v_42_01)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2canonpol |
| Name in data set | v_42_01 |
| Definition | <p>Question: What share of the population is regularly active in independent non-political associations, such as sports clubs, literary societies, charities, fraternal groups or support groups?</p> <p>Responses:</p> <ol style="list-style-type: none"> 0. Virtually no one. 1. A small share of the population (less than 5%). 2. A moderate share of the population (about 5 to 15%). 3. A large share of the population (about 16% to 25%). 4. A very large share of the population (about 26% or more). <p>Clarification:</p> <p>Non-political associations include all associations whose main purpose is not the change of policy or practice at the state or societal level. It does NOT include political parties, or trade unions. An organization is independent if it is not controlled by the state or the ruling party and membership is voluntary. We consider an individual as active if they attend a meeting activity or event at least twice a year.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 4. Participation 4.2. Civic Engagement |
| Aggregation | IRT to construct subattribute 4.2. Civic Engagement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Engagement in independent political associations (v_42_02)

| | |
|-----------------------------------|--|
| Data source | V-Dem |
| Original variable | v2capolit |
| Name in data set | v_42_02 |
| Definition | <p>Question: What share of the population is regularly active in independent political interest associations, such as environmental associations, animal rights groups, or LGBT rights groups?</p> <p>Responses:</p> <ol style="list-style-type: none"> 0. Virtually no one. 1. A small share of the population (less than 5%). 2. A moderate share of the population (about 5% to 15%). 3. A large share of the population (about 16% to 25%). 4. A very large share of the population (about 26% or more). <p>Clarification:</p> <p>Political associations include all associations whose main purpose is the change of policy or practice at the state or societal level. It does NOT include political parties or trade unions. An organization is independent if it is not controlled by the state or the ruling party and membership is voluntary. | Indicator of | 4. Participation 4.2. Civic Engagement |
| Aggregation | IRT to construct subattribute 4.2. Civic Engagement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Engagement in independent trade unions (v_42_03)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2catrauni |
| Name in data set | v_42_03 |
| Definition | <p>Question: What share of the population is regularly active in independent trade unions?</p> <p>Responses:</p> <ol style="list-style-type: none"> 0. Virtually no one. 1. A small share of the population (less than 5%). 2. A moderate share of the population (about 5% to 15%). 3. A large share of the population (about 16% to 25%). 4. A very large share of the population (about 26% or more). <p>Clarification:</p> <p>An organization is independent if it is not controlled by the state or the ruling party and membership is voluntary. We consider an individual as active if they attend a meeting, activity or event at least twice a year.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 4. Participation 4.2. Civic Engagement |
| Aggregation | IRT to construct subattribute 4.2. Civic Engagement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Civil society traditions (v_42_04)

| | |
|-----------------------------------|--|
| Data source | BTI |
| Original variable | civil_trad |
| Name in data set | v_42_04 |
| Definition | <p>Countries scored from 1 to 10, following the statements listed below:</p> <ol style="list-style-type: none"> 1. Traditions of civil society are very strong. 2. 3. 4. Traditions of civil society are fairly strong. 5. 6. 7. Traditions of civil society are fairly weak. 8. 9. 10. Traditions of civil society are very weak. |
| Original scale | Ordinal |
| Citation | Bertelsmann Stiftung (2024) |
| Data manipulation for aggregation | Values for even-numbered years were carried forward from the previous year as BTI produces data bi-annually. Scale was reversed so that higher numbers indicate better performance. |
| Indicator of | 4. Participation 4.2. Civic Engagement |
| Aggregation | IRT to construct subattribute 4.2. Civic Engagement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Mobilization for democracy (v_42_05)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2cademmob |
| Name in data set | v_42_05 |
| Definition | <p>Question: In this year, how frequent and large have events of mass mobilization for pro-democratic aims been?</p> <p>Responses:</p> <p>0: There have been virtually no events.</p> <p>1: There have been several small-scale events.</p> <p>2: There have been many small-scale events.</p> <p>3: There have been several large-scale and small-scale events.</p> <p>4: There have been many large-scale and small-scale events.</p> <p>Clarification:</p> <p>Events are pro-democratic if they are organized with the explicit aim to advance and/or protect democratic institutions such as free and fair elections with multiple parties, and courts and parliaments; or if they are in support of civil liberties such as freedom of association and speech. This question concerns the mobilization of citizens for mass events such as demonstrations, strikes and sit-ins.</p> |
| Original scale | Ordinal, converted to interval by the measurement model. |
| Citation | Pemstein et al. (2025) Coppedge et al. (2025) |
| Data manipulation for aggregation | Recoded into 20 categories, each containing five percentiles, ranging from 1 (the lowest five percentiles) to 20 (the highest five percentiles). |
| Indicator of | 4. Participation 4.2. Civic Engagement |
| Aggregation | IRT to construct subattribute 4.2. Civic Engagement. |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Voter turnout (as percentage of voting age population) (v_43_01)

| | |
|--|---|
| Data source | IDEA VTD |
| Original variable | VAP turnout |
| Name in data set | v_43_01 |
| Definition | <p>Question: According to official results, what percentage (%) of the adult voting age population (VAP) cast a vote in this national election?</p> <p>Responses: Percentage.</p> <p>Clarification: The VAP can reflect irregularities such as problems with the voters' register or registration system. VAP numbers are estimates since they do not take into account legal or systemic barriers to the exercise of the franchise or account for non-eligible members of the population. Thus, VAP values can surpass 100, which is not an error but reflects such conditions.</p> |
| Original scale | Interval |
| Citation | International IDEA (n.d.) |
| Data manipulation for aggregation | <p>Repeated within elections: values for non-election years are copied from the previous election year. Coded as 0 if the electoral regime (v2x_elecreg from V-Dem) is coded as 0, indicating the absence of regularly scheduled elections, as stipulated by election law or well-established precedent. A small number of cases had values higher than 100. For each of these cases the International IDEA Voter Turnout Database was checked and these were coded as either 100 (if voter turnout in the surrounding elections was close to 100%), or, missing (if voter turnout in the surrounding elections was not close to 100%), or where the turnout data are reliable but the census data are not, turnout as a share of registered voters was used.</p> |
| Indicator of | — |
| Aggregation | — |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Electoral regime index (v_43_02)

| | |
|--|--|
| Data source | V-Dem |
| Original variable | v2x_elecreg |
| Name in data set | v_43_02 |
| Definition | <p>Question: At this time, are regularly scheduled national elections on course, as stipulated by election law or well-established precedent?</p> <p>Reponses:</p> <p>0. No.</p> <p>1. Yes.</p> <p>Clarification: Coded 0 until an executive or legislative election is held, defined by v2xel_elecpres and v2xel_elecparl, then set to 1 until any of the following two events occur (if they occur): (a) that the election was 'aborted', meaning that those elected did not resume power, as defined by v2x_hosabort and v2x_legabort; or (b) an 'electoral interruption', meaning that either the legislature was shut down, as defined by v2xlg_leginter, or there was an executive coup, as defined by v2x_hosinter; in the case of (a) or (b), v2x_elecreg is set to 0 until there is another election.</p> |
| Original scale | Dichotomous |
| Citation | Coppedge et al. (2025) |
| Data manipulation for aggregation | — |
| Indicator of | 4.3. Electoral Participation |
| Aggregation | — |
| Final scale | — |

ADDITIONAL INDEX

Direct Democracy (direct_dem_est)

| | |
|-----------------------------------|---|
| Data source | GSoD Indices |
| Original variable | Constructed variable |
| Name in data set | direct_dem_est |
| Definition | V-Dem offers the only comprehensive data set in the form of the direct democracy index developed by David Altman (2016). It is based on observable variables on the formal opportunities for and actual use of different instruments of direct democracy at the national level. However, it seems pertinent to take into account whether mechanisms of direct democracy are available and used in a context where elections are generally respected as the main source of political power. To do so, the Credible Elections subattribute is also used here. The measure of direct democracy and the Credible Elections subattribute are multiplied to estimate the Direct Democracy subattribute score. |
| Original scale | Interval |
| Citation | Skaaning and Hudson (2025) |
| Data manipulation for aggregation | — |
| Indicator of | — |
| Aggregation | — |
| Indicators included | v_00_01, cred_elect_est |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

Indicators

Direct democracy (v_00_01)

| | |
|-----------------------------------|---|
| Data source | V-Dem |
| Original variable | v2xdd_dd |
| Name in data set | v_00_01 |
| Definition | <p>Question: To what extent are direct popular votes utilized?</p> <p>Clarification: Direct popular votes are institutionalized processes by which citizens of a region or country register their choice or opinion on specific issues through a ballot. The term is intended to embrace initiatives, referendums and plebiscites, as they are usually understood. It captures some aspects of the more general concept of direct democracy. The term does not encompass recall elections, deliberative assemblies or settings in which the vote is not secret or the purview is restricted. Similarly, it does not apply to elections for representatives.</p> |
| Original scale | Interval |
| Citation | Coppedge et al. (2025) |
| Data manipulation for aggregation | Coded as zero if there are no elections or if the electoral process has been suspended or nullified (e.g. through dismissal or dissolution of the relevant elected bodies or offices), as indicated by values of zero for both executive_elections and legislative_elections from the LIED data set. |
| Indicator of | 0.0. Direct Democracy |
| Aggregation | Multiplication with cred_elect_est |
| Final scale | Scaled to range from 0 (lowest score) to 1 (highest score). |

About the authors

Claudiu D. Tufis is an Associate Professor at the Faculty of Political Science at the University of Bucharest, where he teaches quantitative methodology, civil society, social movements and democratization. He holds a master's degree in sociology (Central European University) and a PhD in political science (Pennsylvania State University). He is a founding member of the Centre for International Cooperation and Development Studies (IDC) at the University of Bucharest, a founding member of the Romanian Quantitative Studies Association (RQSA), and a member of the Romanian Group for the Study of Social Values.

Alexander Hudson is a Senior Adviser in the Democracy Assessment Unit of International IDEA's Global Programmes in Stockholm. As part of the team that produces the Global State of Democracy Indices and Global State of Democracy Report, he contributes to data collection, analysis and visualization work. He holds a master's degree (University of Waterloo) and a PhD (University of Texas at Austin) in political science.

About International IDEA

The International Institute for Democracy and Electoral Assistance (International IDEA) is an intergovernmental organization with 35 Member States founded in 1995, with a mandate to support sustainable democracy worldwide.

WHAT WE DO

We develop policy-friendly research related to elections, parliaments, constitutions, digitalization, climate change, inclusion and political representation, all under the umbrella of the UN Sustainable Development Goals. We assess the performance of democracies around the world through our unique Global State of Democracy Indices and Democracy Tracker.

We provide capacity development and expert advice to democratic actors including governments, parliaments, election officials and civil society. We develop tools and publish databases, books and primers in several languages on topics ranging from voter turnout to gender quotas.

We bring states and non-state actors together for dialogues and lesson sharing. We stand up and speak out to promote and protect democracy worldwide.

WHERE WE WORK

Our headquarters is in Stockholm, and we have regional and country offices in Africa, Asia and the Pacific, Europe, and Latin America and the Caribbean. International IDEA is a Permanent Observer to the United Nations and is accredited to European Union institutions.

OUR PUBLICATIONS AND DATABASES

We have a catalogue with more than 1,000 publications and over 25 databases on our website. Most of our publications can be downloaded free of charge.

<<https://www.idea.int>>

The Global State of Democracy is a report that aims to provide policymakers with an evidence-based analysis of the state of global democracy, supported by the Global State of Democracy (GSoD) Indices, in order to inform policy interventions and identify problem-solving approaches to trends affecting the quality of democracy around the world.

This document presents revised and updated information about all the variables included in the GSoD Indices data set that enabled the construction of Version 9 of the GSoD Indices, which depicts democratic trends at the country, regional and global levels across a broad range of different attributes of democracy in the period 1975–2024.

The data underlying the GSoD Indices is based on a total of 154 indicators developed by various scholars and organizations using different types of sources, including expert surveys, standards-based coding by research groups and analysts, observational data and composite measures.
